Preserving History Scott Monroe Waring, 2011-06-01 What and how to teach in the K 16 classroom history has been a perennial and at times heated debate Beginning as early as 1892 the question of what knowledge is of the most worth and what should be the central function of the history curriculum became a focus of many interested in education It was felt that the teachers needed to move away from traditional methods of teaching history such as rote memorization and the dry and lifeless system of instruction by textbook and find new and engaging ways to broaden and cultivate the mind Unfortunately these recommendations faced many critics and did not take hold in K 16 classrooms at this time or frankly at any point since then Even though we tend to have a nostalgic memory of earlier time periods and in turn the educational capabilities of the children from various times in our nation s past the results from multiple studies examining the historical knowledge base of America s youth has remained fairly discouraging Much of the lack of knowledge present stems from the manner in which history is traditionally taught Ineffective instructional methods greatly impact the interest levels or more frequently the distaste generated for learning about historical content and thus the public s corresponding perception of the importance of history within K 16 curricula This book makes an effort at overcoming the persistent boredom and lack of historical knowledge present in our students by focusing on ways in which history instruction can be improved

Preservation of historical documents and library related materials is a growing problem in all library types and institutions. Fortunately, editors Carol Smallwood and Elaine Williams have pulled together the wisdom of practicing professionals to elucidate how to cope with the many problems that arise when preserving, managing, and digitizing important collections. Preserving Local Writers, Genealogy, Photographs, Newspapers, and Related Materials contains informative chapters on physical preservation, collection management, cooperation with organizations and communities, various formats, and special projects. Each part covers the preservation of specific materials from newspapers and scrapbooks to photographs and oral histories. In addition, chapters cover repair and restoration of materials while taking into consideration the current state of funding for agencies with an interest in history. Contributors also shed light on how the racial, economic, and political dynamics of the past affect how collections are gathered, maintained, and presented today. Preserving Local Writers, Genealogy, Photographs, Newspapers, and Related Materials offers plenty to inspire anyone facing backlogs of unprocessed papers or boxes of artifacts. Stories of the rescue efforts of a group of volunteers or the discovery of a lost diary show that the hard work of preservation is well worth it. Libraries, archives, and historical and genealogical societies all have their role to play in preserving important historical materials, as do patrons, sponsors, and volunteers. Such institutions and individuals will find this book extremely helpful in their preservation efforts.
