Snapshots of a Century in African American Lives Jennifer Cain Bohrnstedt, 2010 *History Today*, 1999 *High Impact Marketing That Gets Results* Ardi Kolah, 2013-01-03 Great marketing isn't just about marketing output. It's about creating measurable business outcomes. High Impact Marketing That Gets Results is dedicated to helping marketing students and practitioners understand how to achieve an increase in profits through more cost-effective sales and marketing activities where the return on investment is the measure of whether that goal has been achieved. High Impact Marketing That Gets Results covers the full range of the marketing mix within the broader context of overall marketing strategy including market and customer segmentation, writing a marketing plan, understanding the marketing mix, brochures, press ads, and print copy, signs, posters, and ambient media, online marketing, mobile marketing, direct marketing, public relations, using promotions, top ten common marketing mistakes to avoid, and top ten ways to save money in marketing. *20th Century Media and the American Psyche* Charisse L'Pree Corsbie-Massay, 2020-10-13 This innovative text bridges media theory, psychology, and interpersonal communication by describing how our relationships with media emulate the relationships we develop with friends and romantic partners through their ability to replicate intimacy, regularity, and reciprocity. In research-rich conversational chapters, the author applies psychological principles to understand how nine influential media technologies: theatrical film, recorded music, consumer market cameras, radio network, and cable television, tape, cassettes, video gaming, and dial-up internet service providers irreversibly changed the communication environment, culture, and psychological expectations that we then apply to future media technologies. With special attention to mediums absent from the traditional literature including recorded music, cable television, and magnetic tape, this book encourages readers to critically reflect on their own past relationships with media and consider the present environment and the future of media given their own personal habits. *20th Century Media and the American Psyche* is ideal for media studies, communication, and psychology students, scholars, and industry professionals, as well as anyone interested in a greater understanding of the psychological significance of media technology usage and adoption across the past 150 years. **A World at War, 1911-1949**, 2019-03-27 In *A World At War 1911-1949*, leading and emerging scholars of the cultural history of the two world wars begin to break down the traditional barriers between the historiographies of the two conflicts, identifying commonalities as well as casting new light on each as part of a broader mission in honour of Professor John Horne to expand the boundaries of academic exploration of warfare in the 20th century. Utilizing techniques and approaches developed by cultural historians of the First World War, this volume showcases and explores four crucial themes relating to the socio-cultural attributes and representation of war that cut across both the First and Second World Wars: cultural mobilization, the nature and depiction of combat, the experience of civilians under fire, and the different meanings of victory and defeat. Contributors are Annette Becker, Robert Dale, Alex Dowdall, Robert Gerwarth, John Horne, Tom's Irish, Heather Jones, Alan Kramer, Edward Madigan,

Anthony McElligott Michael S Neiberg John Paul Newman Catriona Pennell Filipe Ribeiro de Meneses Daniel Todman and Jay Winter See inside the book The People and the State Thomas O'Brien, 2017-08-09 Protest has proliferated in the early part of the twenty first century forcing change in political systems and challenging established patterns of behaviour The factors driving these protests range from religion and inequality through to the effectiveness of the state and its role in protecting the rights of citizens The growth in discontent represented by these protests potentially threatens the stability of the state by raising questions about the right of governments to govern Anger and frustration embodied in many of these actions has resulted in the growth of support for populist political actors promising simplified solutions to the complex underlying issues In this way the inability of the state to address the claims of its population potentially places its continued viability at risk The cases in this collection examine a range of protest movements from around the world in both democratic and authoritarian political systems to provide an overview of contemporary issues and protest forms Addressing contemporary protest in this manner is an important task in supporting our understanding of the root causes of the current tensions and their possible future effects This book is a compilation of articles from a special issue of Contemporary Social Science with additional papers selected from Contemporary Politics Journal of Contemporary China and Democratization

Unburied Memories: The Politics of Bodies of Sacred Defense Martyrs in Iran Pedram Khosronejad,2013-09-13 Today almost a generation has passed since the Iran Iraq war and the memory of it is set to diminish with each passing generation The following questions emerge Can we say that the gradual disappearance of war s memory means that increasingly Iranians will see the Iran Iraq war solely as an historical event How can we defend or reject this idea Today with which elements and values should we look at the Iran Iraq war memorials and ceremonies To what extent will war museums and materials culture be influenced by these new values In the period during and immediately after the Iran Iraq war 1980 88 national bereavement and commemoration of martyrs was neither apparent in common state policy nor a social need Even at the turn of the 21st century anyone walking through Iranian cities many of which had been the main scene of the bloody massacre and direct targets of the Iraqi Republican Guard will have found traces of the terrible almost unimaginable human losses However today s Iranians can see modern war memorials and monuments in many parts of the urban and rural landscape Yet at the same time the changing landscape has separated Iranians from such remnants of the violence It can be argued that many people in their wish to look forward to a more hopeful future do not wish to be reminded of this period in Iranian history This book was originally published as a special issue of *Visual Anthropology*
