Interpreter Training in Context Jie Liu,2020-10-07 This book addresses an important yet under researched domain in interpreting education how theoretical training models should be responsive to context To do so it

applies the linguistic concept of context to interpreting studies by investigating practices in representative conference interpreting training programmes in Europe and China After presenting an overview of interpreter training programmes the author describes the need to reassess the applicability of the well established and widely accepted model of interpreting from the Paris School ESIT AIIC model to the Chinese interpreting training scene Building on the theoretical study of context in foreign language classrooms suggested by linguists like Halliday and Hasan 1993 Kramsch 1993 and others the author subsequently constructs a new curriculum comprising a four step approach to consecutive interpreting courses in the Chinese context The rationale for such an approach is justified in accordance with the overall design of context taking into account the four dimensions in a teaching learning environment This book is intended for scholars and graduate students who are interested in translation and interpreting applied linguistics as well as foreign language education It also serves as a practical guide for developing university level translation and interpreting programmes
