Threshold Concepts in the Moment ,2024-04-22 In the twenty years since Ray Land and Erik Meyer published their first paper on Threshold Concepts there has been a steady stream of papers mulling over their original suggestions that learning far from proceeding in an orderly fashion is instead a process of struggle perhaps alienation and confusion that puts students in a troublesome liminal in between state As their understanding develops liminality gives way to transformational insight whereby a whole field of study comes often quite abruptly into focus There is a gain but often also a loss in this new world old certainties assumptions and even aspects of our identity can be left by the wayside Threshold Concepts in the Moment is the sixth collection in the series on the subject of Threshold Concepts following the 8th Biennial Conference held in 2021 anchored at London s UCL but running online across the world Its contributors who range from old hands to new members of the community finding their feet mull over the insights of the threshold concepts framework in higher education scrutinise their own fields of study explore the implications of liminality for pedagogy and becoming professional practitioners and consider the broad implications for pedagogy of factoring in the troublesomeness of knowledge and learning

Seeing Things Hidden Malcolm Bull,1999 The multiplicity of the self and the inaccessibility of truth are commonplaces of contemporary thought But in Seeing Things Hidden they become key features of a philosophy of history that reunites emancipatory political theory with the apocalyptic tradition Apocalyptic is the revelation of things hidden But what does it mean to be hidden And why are things hidden in the first place By gently teasing out the meanings of hiddenness this book develops a new theory of apocalyptic and explores its relation to the writings of Kant Hegel Benjamin and Derrida Exploiting affinities between the work of Luk cs and recent American philosophers like Rorty and Cavell Bull argues that the central dynamic of late modernity is the coming into hiding of the contradictory identities generated through political and social emancipation Drawing on analytic and Continental philosophy he articulates the most ambitious philosophy of history since Francis Fukuyama s The End of History presenting fresh interpretations of such icons of modernity as Hegel s master slave dialectic Benjamin s angel of history Du Bois s concept of double consciousness and Rawls s veil of ignorance

Wittgenstein Ludwig Wittgenstein, 1966-06 The first thing to be said about this book is that nothing contained herein was written by Wittgenstein himself The notes published here are not Wittgenstein's own lecture notes but notes taken down by students which he neither saw nor checked It is even doubtful if he would have approved of their publication as least in their present form Since however they deal with topics only briefly touched upon in his other published writings and since for some time they have been circulating privately it was thought best to publish them in a form approved by their authors

Consecrating Science Lisa H. Sideris,2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe *Contemporary Women Stage Directors* Paulette Marty,2019-03-21 *Contemporary Women Stage Directors* opens the door into the minds of 27 prolific female theatre directors allowing you to explore their experience wisdom and knowledge Directors give insight into their diverse approaches to the key challenges of directing theatre including choosing projects engaging with scripts conceptualizing visual and acoustic production elements collaborating with actors and production teams building their careers and navigating challenges and opportunities posed by gender race and ethnicity The directors featured include Maria Aberg May Adrales Sarah Benson Karin Coonrod Rachel Chavkin Lear deBessonet Nadia Fall Vicky Featherstone Polly Findlay Leah Gardiner Anne Kauffman Lucy Kerbel Young Jean Lee Patricia McGregor Blanche McIntyre Paulette Randall Diane Rodriguez Indhu Rubasingham KJ Sanchez Tina Satter Kimberly Senior Roxana Silbert Leigh Silverman Caroline Steinbeis Liesl Tommy Lyndsey Turner and Erica Whyman These women are making profoundly exciting theatre in some of the most influential organizations across the English speaking world from Broadway to the West End from the National Theatre in London to Center Theatre Group in Los Angeles As
