Physical Activity and Health Audrey F. Manley, 1996-11 This report is the first report of the Surgeon General on physical activity and health For more than a century the Surgeon General of the Public Health Service has focused the nation's attention on important public health issues Reports from Surgeons General on the adverse health consequences of smoking triggered nationwide efforts to prevent tobacco use Reports on nutrition violence and HIV AIDS to name but a few have heightened America's awareness of important public health issues and have spawned major public health initiatives This new report which is a comprehensive review of the available scientific evidence about the relationship between physical activity and health status follows in this notable tradition Scientists and doctors have known for years that substantial benefits can be gained from regular physical activity The expanding and strengthening evidence on the relationship between physical activity and health necessitates the focus this report brings to this important public health challenge Although the science of physical activity is a complex and still developing field we have today strong evidence to indicate that regular physical activity will provide clear and substantial health gains In this sense the report is more than a summary of the science it is a national call to action

Cancer Prevention and Management through Exercise and Weight Control Anne McTiernan, 2016-04-19 it is increasingly clear that cancer is also a disease of inertia In this book a broadly multidisciplinary group presents the evidence and provides the recommendations The antidote to diseases of inertia is movement let's move John Potter M D Ph D from the Foreword The American Cancer Society estimates that a third of all cancer deaths could be prevented through avoidance of obesity and the rejection of sedentary lifestyles The World Health

Organization also supports this claim Additionally these and other organizations now recognize the role that activity can play in improving the quality of life for cancer patients Cancer Prevention and Management through Exercise and Weight Control provides us with the support necessary to make a call to action It brings together the contributions of world class researchers to lay out the evidence and a plan of attack for coping with this crisis The text begins by focusing on the research methods used in assessing the complex associations between activity energy balance and risk and prognosis In comprehensive literature reviews the authors consider the role of physical activity in the incidence of individual cancers then explore the mechanisms that might explain this connection They continue with a look at the relation between weight and cancer incidence including a consideration of genetics Research is also provided linking physical activity and weight control to a cancer patient s quality of life and prognosis The work concludes with ideas on how a plan of action might be implemented at the individual clinical and public health levels It also provides guidance on incorporating exercise and diet recommendations into clinical oncology practice

Physical Activity and Health Adrienne E. Hardman, David J. Stensel, 2003 This major new textbook takes an international perspective and is the first to provide a comprehensive authoritative guide to the important area of exercise and health Midwest

Physical Activity and Health , 1998 This is the first Surgeon General s report to address physical activity and health The main message of this report is that Americans can substantially improve their health and quality of life by including moderate amounts of physical activity in their daily lives Health benefits from physical activity are thus achievable for most Americans including those who may dislike vigorous exercise and those who may have been previously discouraged by the difficulty of adhering to a program of vigorous exercise For those who are already achieving regular moderate amounts of activity additional benefits can be gained by further increases in activity level Extr introd 1996
