Everyday Virtual and Augmented Reality Adalberto Simeone, Benjamin Weyers, Svetlana Bialkova, Robert W. Lindeman, 2023-02-18 This edited book introduces readers to the area of Everyday Virtual and Augmented Reality With Virtual and Augmented Reality technologies becoming more pervasive in our homes and workplaces new use cases and scenarios emerge together with new challenges that need to be addressed These challenges encompass the design and implementation of appropriate VR AR

applications for ordinary environments that were not built with the explicit intention of supporting VR systems. The everyday domestic environments present a range of issues that are usually not present in the physical locations purposed for VR and AR use in academic or professional environments such as constrained spaces, presence of obstacles, absence of instrumentation, social and organizational restrictions etc. To address the above challenges, we collect the latest work from the Virtual Reality and Augmented Reality research community by combining the presentation of general definitions and characterization of the field of interaction concepts and techniques of a variety of use cases and areas. The constellation of different environment examples from education, sport to consumer and marketing from across the globe and platforms provide a comprehensive discussion on scientific and engineering methods which enable the development of VR/AR systems in everyday context.

Exercise and Fitness Training After Stroke Gillian E Mead, Frederike van Wijck, 2012-09-27. This brand new book is the first of its kind dedicated to exercise and fitness training after stroke. It aims to provide health and exercise professionals and other suitably qualified individuals with the necessary information to design and evaluate exercise and fitness programmes for stroke survivors that are safe and effective. The content is based on current evidence and aligned with national clinical guidelines and service frameworks, highlighting the importance of physical activity in self-management after stroke. The book has also been written for stroke survivors and carers who may be interested in physical activity after stroke. *Exercise and Fitness Training After Stroke* comprehensively discusses the manifestations of stroke and how stroke is managed, the evidence for exercise and fitness training after stroke, how to design, deliver, adapt and evaluate exercise as well as how to set up exercise services and specialist fitness training programmes for stroke survivors. Includes detailed background in stroke pathology, stroke management and how post-stroke problems may affect the ability to participate in exercise. Dedicated to evidence-based exercise prescription with special considerations, cautions and therapy-based strategies for safe practice. Covers issues of a professional nature including national occupational standards, exercise referral pathways as well as risk assessment and management related to stroke survivors. Quality content from a highly qualified, experienced and respected multidisciplinary team.
