## **Problems And Issues In Political Science:**

**Political Science in Theory and Practice: The Politics Model** Kris E Lane, 2020-11-25 This text demonstrates that there is a politics model that unifies the discipline and structures its relationship to the other social sciences It shows how this model underlies important works of applied research in all the main political science subfields Leo Strauss and the Problem of Political Philosophy Michael P. Zuckert, Catherine H. Zuckert, 2014-06-30 This critical study of the influential political theorist dispels popular myths and reveals the inner logic of his varied and notoriously complex writings Political theorist Leo Strauss was unexpectedly thrust into the media spotlight for his alleged influence on neoconservative politics With The Truth about Leo Strauss Michael and Catherine Zuckert challenged the many claims and speculations about this complex thinker Now with Leo Strauss and the Problem of Political Philosophy they offer a more comprehensive interpretation of Strauss's thought using the many manifestations of the problem of political philosophy as their touchstone Strauss they argue sought to restore political philosophy to its original Socratic form This is demonstrated through his critique of positivism and historicism two intellectual currents that undermined his Socratic project The authors also explore Strauss's interpretation of both ancient and modern political philosophers including Plato Aristotle Machiavelli and Locke Finally they examine Strauss's thought in the context of the twentieth century when his chief interlocutors were Schmitt Husserl Heidegger and Nietzsche Leo Strauss and the Problem of Political Philosophy is the most in depth treatment of this often misunderstood thinker examining his ideas across his long career It reveals Strauss's overall intellectual project to decode how ancient and modern theory attempted to solve the problem of political philosophy And it shows why Strauss considered the ancient solution both philosophically and politically superior *Political Science Quarterly*, 1919 A review devoted to the historical statistical and comparative study of politics economics and public law **Addressing Global Environmental Challenges from a Peace Ecology Perspective** Hans Günter Brauch, Úrsula Oswald Spring, Juliet Bennett, Serena Eréndira Serrano Oswald, 2016-10-08 Addressing global environmental challenges from a peace ecology perspective the present book offers peer reviewed texts that build on the expanding field of peace ecology and applies this concept to global environmental challenges in the Anthropocene Hans G nter Brauch Germany offers a typology of time and turning points in the 20th century Juliet Bennett Australia discusses the global ecological crisis resulting from a tyranny of small decisions Katharina Bitzker Canada debates the emotional dimensions of ecological peacebuilding through love of nature Henri Myrtilinen UK analyses preliminary findings on gender peacebuilding and climate change in Honduras while Úrsula Oswald Spring Mexico offers a critical review of the policy and scientific nexus debate on the water energy food and biodiversity nexus reflecting on security in Mexico In closing Brauch discusses whether strategies of sustainability transition may enhance the prospects for achieving sustainable peace in the Anthropocene **Political Science** William J. Crotty, 1991 In this volume the study of legislatures has traditionally been a central preoccupation of political scientists

years the history of political science has become recognised as an important but neglected area of study The Development of Political Science is the first comprehensive discussion of the subject in a comparative international perspective Offering a wide ranging account of the development of the subject and its dissemination across national borders and cultural divides the book begins with a study of the historiography of the discipline in the United States a country which has been at the forefront of the field Widening its discussion to emphasise Western Europe as a focus for comparison the contributors provide studies of further areas of interest such as China and Africa This particular approach emphasises the book s vision of political science as a growing transnational body of knowledge In presenting critical analysis of the state of the field this vigorous study aims to further the development of the discipline in the countries discussed and to provide a work that is interesting not only to political scientists but to all those concerned with the development of the social sciences International
