Introduction Did you know that the concept of dieting is a relatively modern one In ancient times the mere idea of going without food in order to lose weight was not very common or usual That is because most of the time a large majority of people did not have enough of food to eat So the idea of their becoming fat was reduced Also our ancestors made sure that they spent a major part of their lives doing hard physical labor in the open air That is why the food that they ate was easily assimilated in their bodies This meant that there was no chance of their gaining extra weight or the accumulation of extra cellulite on any part of their bodies Man was naturally conditioned through his genes to have a protective layer of fat on his body That is why down the centuries the idea of no fat on a body did not disturb his equanimity You may want to look at all the paintings and statues down the centuries The women and even children are Ruben esque in nature which means they are chubby and plump *The Easy-Does-It Diet* Jonni Good,2003-08
