Reading Hebrew Joseph Shimron, 2015-06-12 Over the last two decades the study of languages and writing systems and their relationship to literacy acquisition has begun to spread beyond studies based mostly on English language learners As the worldwide demand for literacy continues to grow researchers from different countries with different language backgrounds have begun examining the connection between their language and writing system and literacy acquisition This volume is part of this new emerging field of research In addition to reviewing psychological research on reading the author's specialty the reader is introduced to the Hebrew language its structure its history its writing system and the issues involved in being fluently literate in Hebrew Chapters 1-4 introduce the reader to the Hebrew language and word structure and focuses on aspects of Hebrew that have been specifically researched by experimental cognitive psychologists The reader whose only interest is in the psychological mechanisms of reading Hebrew may be satisfied with these chapters Chapters 5-8 briefly surveys the history of the Hebrew language and its writing system the origin of literacy in Hebrew as one of the first alphabetic systems and then raises questions about the viability or possibility of having full scale literacy in Hebrew Together the two sets of chapters present the necessary background for studying the psychology of reading Hebrew and literacy in Hebrew This volume is appropriate for anyone interested in comparative reading and writing systems or in the Hebrew language in particular This includes linguists researchers and graduate students in such diverse fields as cognitive psychology psycholinguistics literacy education English as a second language and communication disorders

Learning to Read Across Languages Keiko Koda, Annette M. Zehler, 2008-03-03 This book systematically examines how learning to read occurs in diverse languages and in so doing explores how literacy is learned in a second language by learners who have achieved at least basic reading skills in their first language As a consequence of rapid globalization such learners are a large and growing segment of the school population worldwide and an increasing number of schools are challenged by learners from a wide variety of languages and with distinct prior literacy experiences To succeed academically these learners must develop second language literacy skills yet little is known about the ways in which they learn to read in their first languages and even less about how the specific nature and level of their first language literacy affects second language reading development This volume provides detailed descriptions of five typologically diverse languages and their writing systems and offers comparisons of learning to read experiences in these languages Specifically it addresses the requisite competencies in learning to read in each of the languages how language and writing system properties affect the way children learn to read and the extent and ways in which literacy learning experience in one language can play a role in subsequent reading development in another Both common and distinct aspects of literacy learning experiences across languages are identified thus establishing a basis for determining which skills are available for transfer in second language reading development *Learning to Read Across Languages* is intended for researchers and advanced students in the areas of second language
