Reading Writing And The Humanities:

Reading, Writing and the Humanities Jo Ray McCuen, Anthony C Winkler, 1990-11 Reading Writing and the Humanities is organized around eight classic enduring themes and features extensive reading and writing for students. In selecting philosophy, history, and literature as the primary categories for grouping the readings, this text retained this early meaning of humanities as consisting of subjects whose emphasis is mainly human-centered. Our chapter titles are variations on some profound and timeless questions that writers and thinkers in the humanities have grappled with for centuries, while the subtitles declare the underlying issue that is the featured theme. Reading Writing and the Humanities will stir awake the analytical and critical minds of students.

The Heart of the Humanities Mark Edmundson, 2018-02-06 From one of America's great professors, a collection of works exploring the importance of reading, writing, and teaching well for anyone invested in the future of the humanities. A renowned professor of English at the University of Virginia, Mark Edmundson has devoted his career to tough-minded yet optimistic advocacy for the humanities. He argues for the importance of reading and writing to an examined and fruitful life and affirms the invaluable role of teachers in opening up fresh paths for their students. In his series of books *Why Read*, *Why Teach*, and *Why Write*, Edmundson explored the vital worldly roles of reading, teaching, and writing, earning a vocal following of writers, teachers, and scholars at the top of their fields, from novelist Tom Perrotta to critics Laura Kipnis and J. Hillis Miller. Now, for the first time, *The Heart of the Humanities* collects into one volume this triad of impassioned arguments, including an introduction from the author on the value of education in the present and for the future. The perfect gift for students, recent graduates, writers, teachers, and anyone interested in education and the life of the mind, this omnibus edition will make a powerful and timely case for strengthening the humanities both in schools and in our society.

The Word on College Reading and Writing Monique Babin, 2017 *Resources in Education*, 1995 Summer Seminars for School Teachers, 1993 **Critical Reading Across the Curriculum, Volume 1** Robert DiYanni, Anton Borst, 2017-02-08 Powerful strategies, tools and techniques for educators teaching students critical reading skills in the humanities. Every educator understands the importance of teaching students how to read critically. Even the best teachers, however, find it challenging to translate their own learned critical reading practices into explicit strategies for their students. *Critical Reading Across the Curriculum: Humanities Volume 1* presents exceptional insight into what educators require to facilitate critical and creative thinking skills. Written by scholar educators from across the humanities, each of the thirteen essays in this volume describes strategies educators have successfully executed to develop critical reading skills in students studying the humanities. These include ways to help students focus actively, re-read and reflect to re-think and re-consider, understand the close relationship between reading and writing, become cognizant of the critical importance of context in critical reading and of making contextual connections, learn to ask the right questions in critical reading and reasoning, appreciate reading as dialogue, debate and engaged conversation. In addition, teachers will find an abundance of innovative exercises and activities encouraging students to practice their critical reading skills. These can easily be adapted for and applied across many disciplines and course curricula in the humanities. The lifelong benefits of strong critical reading skills are undeniable. Students with properly developed critical reading skills are confident learners with an enriched understanding of the world around them. They advance academically and are prepared for college success. This book arms educators, librarians, high school teachers, university lecturers and beyond with the tools to teach a most paramount lesson. As the techniques and scale of data analysis advance, the need for a response from rhetoric and composition grows ever more pronounced. It is increasingly possible to examine thousands of documents and peer review comments, labor hours and citation networks in composition courses and beyond. *Composition and Big Data* brings together a range of scholars, teachers and administrators already working with big data methods and datasets to kickstart a collective reckoning with the role that algorithmic and computational approaches can or should play in research and teaching in the field.
