Readings In American Business History:

Readings in American Business History Peter A. Coclanis, 2004-08-30 **Business History** K. A. Tucker, 2013-11-05 This selection of readings demonstrates the use of both descriptive analysis and quantitative methods in the study of business records. The emphasis, however, is on the role of various quantitative approaches. Part I contains articles that consider a number of questions about the methods to be used and the aims of business history research. How is the subject to be defined? What types of analysis are most useful in research? In what ways can the findings of any research be used? Part II provides a number of examples of business history writing that demonstrate the results of a quantitative approach using both primary and secondary source material. Some of the papers concentrate on the growth and performance of firms from various sectors of the economy. Some consider features of industrial structure. Others concentrate on techniques of marketing, personnel management, and the assessment of profitability. Part III focuses on the techniques of management that have been used to motivate or control the development of business activity. The studies include an analysis of the role of accounting data and other types of information aids to forecasting, market analysis, and the problems of risk and uncertainty in business decision making within various contexts. The editor has not only provided an introduction to the reprinted articles but he has also included in Part IV several special appendices useful for future research in business history. There is a section on allowing for changes in the unit of account. Another appendix deals with the merits and limitations of financial ratio analysis. An extensive bibliography is also provided. This authoritative text was first published in 1977.

The Changing Economic Order Alfred Dupont Chandler, Louis Galambos, 1963 **Local Businesses** Kathel Austin Kerr, Amos J. Loveday, Mansel G. Blackford, 1990 With this volume the Nearby History Series will lead you on a journey to discover how the businesses in your community helped shape its present form. Providing fundamental information on the processes of investigating a business heritage, *Local Businesses* acts as a complete guide for local historians and historical societies, business historians, business owners, local citizens, museum workers, and librarians interested in examining this aspect of local history. *Local Businesses* is Volume 5 in The Nearby History Series.

International Bibliography of Business History Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years. There is less interest in the traditional company-centred approach and more concern about the wider business context. With the growth of multi-national corporations in the 1980s, international and inter-firm comparisons have gained in importance. In addition, there has been a move towards improving links with mainstream economic, financial, and social history through techniques and outlook. The *International Bibliography of Business History* brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians.

Encyclopedia of African American Business History Juliet E. K.

Walker,1999-11-30 Black business activity has been sustained in America for almost four centuries From the marketing and trading activities of African slaves in Colonial America to the rise of 20th century black corporate America African American participation in self employed economic activities has been a persistent theme in the black experience Yet unlike other topics in African American history the study of black business has been limited General reference sources on the black experience with their emphasis on social cultural and political life provide little information on topics related to the history of black business This invaluable encyclopedia is the only reference source providing information on the broad range of topics that illuminate black business history Providing readily accessible information on the black business experience the encyclopedia provides an overview of black business activities and underscores the existence of a historic tradition of black American business participation Entries range from biographies of black business people to overview surveys of business activities from the 1600s to the 1990s including slave and free black business activities and the Black Wallstreet to coverage of black women s business activities and discussions of such African American specific industries as catering funeral enterprises insurance and hair care and cosmetic products Also there are entries on blacks in the automotive parts industry black investment banks black companies listed on the stock market blacks and corporate America civil rights and black business and black athletes and business activities

Management Laureates Arthur G. Bedeian,2018-04-17 First published in 1992 This volume compiles the autobiographies of the management discipline s most distinguished laureates Prior to this publication the available management literature provided little insight into the personal and intellectual lives the frustrations as well as the triumphs of the individuals in the management discipline Although such understanding could be conveyed in many forms perhaps the most intimate and fascinating of these for gaining behind the scenes insights is the autobiography Thus the autobiographies in this volume as in the five companion volumes offer the reader not only a glimpse of the subjective determinants and personal experiences of the management discipline s most distinguished laureates but also a deeper understanding of what management is and what it is becoming The various accounts reflect a diversity of approaches interests and experiences

Teaching and Learning in History Ola Hallden,2012-10-12 Research on history instruction and learning is emerging as an exciting new field of inquiry The editors prepared this volume because the field is at an important moment in its development a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics However the newer research goes beyond these activities as well Where traditional research approaches to social studies instruction and learning have focused on curriculum they have avoided the study of purely disciplinary features the textual components of history and the concomitant demands as well as the nature of various learners Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction they have avoided topics such as perspective taking interpretation and rhetorical layerings The new work by contrast has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as What affects the quality of teaching How are historical documents interpreted in the writing of history How is history explained What are the classroom demands on an elementary school social studies teacher What does text accomplish or fail to accomplish in educational settings How do teachers think about particular topics for history teaching Although much of the research reflects a grounding in or the influence of cognitive psychology not all of it derives from that tradition Traditions of rhetoric curriculum analysis and developmental psychology are also woven throughout the chapters The editors envision this volume as a contribution to educational research in a subject matter and as a tool for practitioners concerned with the improvement of instruction in history They also anticipate that it will contribute to cognitive science
