Innovation in Pricing Andreas Hinterhuber, Stephan M. Liozu, 2013-05-07
Pricing has a substantial and immediate impact on profitability. Most companies however still use costs or competition as a main basis for setting prices. Product or business model innovation has a high priority for many companies whereas innovation in pricing has received scant attention. This book examines how innovation in pricing can drive profits. The text examines innovation in pricing from four complementary perspectives. Innovation in Pricing Strategy illustrates how companies implement innovative pricing strategies such as customer value based pricing. Innovation in Pricing Tactics deals with innovative tools to measure and increase customer willingness to pay and to communicate value to B2B and B2C customers. Innovation in Organizing the Pricing Function looks at state of the art approaches to embed the pricing function in the organization. Psychological Aspects of Pricing illustrates how companies can influence customer perceptions of value and price in their question to implement innovation in pricing. This edited volume brings together 26 articles from academics, business practitioners and consultants. Authors are from the world's largest companies, leading research based universities and consulting companies specialized in pricing. This book is the only book dedicated to innovation in pricing and an essential read for business executives and pricing managers wishing to treat innovation in pricing as seriously as they treat product or business model innovation.

Reading, Wanting, and Broken Economics Simon R. Frost, 2021-05-01
Uses a historical study of bookselling and readers as a way to question and rethink our understanding of the market for symbolic goods. Combining historical study, theorization and experimental fiction, this book takes commodity culture and book retail around 1900 as the prime example of a market of symbolic goods. With the port of Southampton, England as his case study, Simon R. Frost reveals how the city's bookshops, with their combinations of libraries, haberdashery, stationery and books, sustained and were sustained by the dreams of ordinary readers and how together they created the values powering this market. The goods in this market were symbolic and were not consumed but read. Their readings were created between other readers and texts in happy disobedience to the neoliberal laws of the free market.

Today such reader created social markets comprise much of the world s branded economies which is why Frost calls for a new understanding of both literary and market values The Market Research Toolbox Edward F. McQuarrie,2015-04-01
