Readings in the Sociology of Language Joshua A. Fishman, 2012-05-07. No detailed description available for Readings in the Sociology of Language.

Thirty Readings in Introductory Sociology Kenneth Alan Gould, Tammy L. Lewis, 2012. Thirty Readings in Introductory Sociology introduces students to the field of sociology in an engaging, accessible manner. Designed to be used alone or with its companion Ten Lessons in Introductory Sociology, the book is organized around four themes commonly examined in introductory courses: What is sociology? What unites society? What divides society? and How do societies change? Rather than provide encyclopedic responses to such questions, Thirty Readings in Introductory Sociology engages students in critical thinking while presenting key concepts and methods in sociology. Edited by Kenneth A. Gould and Tammy L. Lewis, the text raises sociological questions, applies a sociological lens, illustrates how data are used, and presents core topics in a way that is easy for students to grasp. Each section begins with an introduction by Gould and Lewis, followed by three readings: one classical, one that uses qualitative data, and a third that uses quantitative data.

Now in its Third Edition, this engaging reader has broadened its scope even more, presenting additional readings in particular related to the sociology of higher education. The book draws from classic and contemporary scholarship to examine current issues and diverse theoretical approaches to studying the effects of schooling on individuals and society. In addition to covering traditional areas such as stratification and racial inequality, the book also veers off the beaten path, including readings on such contemporary topics as bullying, school shootings, school choice, and teen social media use.

Classic and Contemporary Readings in Sociology Ian Marsh, Rosie Campbell, Mike Keating, 2014-05-12. Classic and Contemporary Readings in Sociology introduces the reader to sociological issues, theories, and debates, providing extracts of primary source material from both classical and contemporary theorists. Theorists are examined within their historical and sociological framework, and the text provides an analysis of developments in sociological thought and research. The text is divided into four main sections: Part One, Origins and Concepts, surveys the history of the discipline of sociology and examines key themes which have influenced sociological theorising and investigation, in particular social control, culture, and socialisation. Parts Two and Four, Sociological Theories and Sociological Research, include a number of readings from the founding theorists and investigators, including Auguste Comte, Emile Durkheim, Karl Marx, Max Weber, and Charles Booth, and also include more recent theoretical writing and research approaches. The focus on theory and research is extended by a selection of readings centred around the theme of Differences and Inequalities. Part Three, these readings provide students
