**Reading Hitler's Mind** Norman Ridley, 2022-07-20

Most strongly associated with Prime Minister Neville Chamberlain it is often stated that Britain s policy of appeasement was instituted in the 1930s in the hope of avoiding war with Hitler s Nazi Germany At the time appeasement was viewed by many as a popular and seemingly pragmatic policy In this book the author sets out to show how appeasement was not a na ve attempt to secure a lasting peace by resolving German grievances but a means of buying time for rearmament By the middle of the 1930s British policy was based on the presumption that the balance of power had already dramatically shifted in Germany s favour It was felt that Britain chiefly for economic reasons was unable to restore the balance and that extensive concessions to Germany would not satisfy Hitler whose aggressive policies intensified the already high risk of war The only realistic option and one that was clearly adopted by Neville Chamberlain was to try to influence the timing of the inevitable military confrontation and in the meantime pursue a steady and economically sustainable program of rearmament Appeasement would buy that time for the British government Crucially this strategy required continuously updated and accurate information about the strength current and future of the German armed forces especially the Luftwaffe and an understanding of their military strategy Piercing the Nazis veil of secrecy was vital if the intelligence services were to build up a true picture of the extent of German rearmament and the purposes to which it might be put The many agents codebreakers and counter espionage personnel played a vital role in maximising the benefits that appeasement provided even as war clouds continued to gather These individuals were increasingly handed greater responsibility in a bid to inform British statesmen now scrambling to prepare for a catastrophic confrontation with Germany In Reading Hitler s Mind

Norman Ridley reveals the remarkable efforts made by the tiny underfunded and often side lined British intelligence services as they sought to inform those whose role it was to make decisions upon which the wheels of history turned

other domestic government departments partner intelligence agencies overseas and most importantly Australia's policy makers. Their aim is to provide the government with information for that is essentially what intelligence is to better enable it to tackle the issues confronting it to be better armed, informed and forewarned of what might lay ahead and to facilitate coherent policy making. But we should not expect intelligence to be perfect nor should we think that good intelligence guarantees good policy. This book draws on a wide range of experts including academics, former and current strategic advisers and members of government, private industry professionals and intelligence community experts to provide a diagnostic, clear-eyed approach in explaining, accessing and exposing the central foundations and frameworks necessary for effective practice of intelligence in Australia as well as the shaping of intelligence expectations.
