Sharing Child Care in Early Parenthood Malcolm Hill, 2023-02-13 Originally published in 1987 Malcolm Hill examines the different ways in which parents share responsibility for looking after their pre school children with other people whether members of their social networks formal groups or paid carers He also looks at the reasons parents give for choosing and changing their particular arrangements In this way he provides insights into a range of ideas which ordinary members of the public have about children s needs the rights and responsibilities of mothers and fathers and how children think and feel Marked differences are described in the social relationships of families and in notions about who is acceptable as a substitute carer for children in what circumstances and for what purpose Several of these contrasts are linked to attitudes and life conditions which are affected by social class The book identifies possible consequences for individual children s social adaptability resulting from these patterns of care It suggests that people working with the under fives could profit from adapting their activities and services to children s previous experiences of shared care and families differing expectations about groups for children

Children and Schooling Philip Gammage, 2012 The book provides a synthesis of a broadly based social psychology of education and bridges the gap between theory and practice in education by emphasising the relationship between research and actuality The author discusses the major issues in childhood socialisation relating to schooling achievement and the curriculum and in so doing makes a sensitive and well argued case for the social psychological perspective He presents a social psychologist s

view of the interaction between child school and curriculum and summarises mainstream psychological contributions to current thinking on achievement self esteem and education He covers areas of social learning and attribution theory not commonly dealt with in education texts showing that there are major fields of research which have until now been neglected Children and Schooling is constructed so that its chapters can be used as independent study guides to specific subjects or read in sequence each subject inter related The text can be treated as an introduction particularly in view of the notes and comprehensive and apposite scholarly apparatus and as a spring board for serious study at advanced level Role: Volume 4, Sociological Studies J.
