The Culture of Value Silviu Vasile, Increasing access to resources or discovering new resources leads to growing needs satisfying them and ultimately growing personal and professional benefits Multiplying resources becomes a desideratum for anyone who understands progress Any way to do this is tried and tested by those who relentlessly seek success Champions also have a keen interest in multiplying value people who have understood to invest immediately in personal development techniques and increase their value constantly In the horizontal plane all you can do is get to 100% you can't go beyond that level no matter how hard you try you can't go beyond 100% and to get to that level you have to be one of the best Vertically using multipliers you can increase the percentages You can multiply an 80% value by taking it up to five levels and getting 400% That's the logic that superstars in every field think in often intuitively There is now enough information that we can apply right now to help us achieve the best results mitigating risk and maximizing our chances of success Now we can multiply our value Some universal values don't have an exact value There are specific values and uncertain values When you invest in certain values you increase your confidence in your strengths and feed your enthusiasm Success is not a random event it is a process that takes time and requires significant consumption of personal resources Success requires a constant investment of time money and energy Nobody guarantees success because it depends on many factors some of them random however leaders can see the evolution and dynamics of events in the future because of their time and space vision If you want to be successful you can constantly increase your chances of success It is one thing to have a 15% chance of success and another 75% chance The better your chances are the closer you are to succeeding
