changes in consumer behavior Even as consumer life became more comfortable and abundant consumers were becoming uneasy about the environmental deterioration associated with high growth The second chapter examines how the Japanese government addressed emissions regulations while drawing on the lessons of America's experience with the same issue The change in industrial structure brought about by economic growth inevitably resulted in the decline of other industries Chief among these was the coal mining industry which with the onset of a full scale energy revolution lost its role as energy supplier owing to the import of cheap crude oil The third chapter discusses the government's industrial policies as they addressed the coal industry's adjustment in the high growth era concluding that they reduced such problems as stagnation unemployment and local industrial decline The adjustments in employment practices contributed positively to the gradual shift of labor from declining industries to growth industries The fourth chapter investigates changes in labor management in the steel industry which was one of the high growth era's leading industries This publication will serve as a valuable resource for those who are interested not only in the post war history in Japan but also in high growth economies in recent East Asia
