Real Civil Societies Dilemmas Of Institutionalization:

Real Civil Societies Jeffrey C Alexander, 1998-06-18 In recent social and political theory the term civil society has achieved renewed currency Traditionally used in a normative or ideal type sense the term describes a form of social organization that is simply neither economic nor political where democracy liberty and widespread solidarity are essential regulatory concepts Written from an empirical social science perspective by some of the world's most important social theorists this volume is a critical examination of the normative sense of civil society It includes analyses of civil society and democracy citizenship race and ethnicity and post communism

The Civil Sphere Jeffrey C. Alexander, 2008-09-08 What binds societies together and how can these social orders be structured in a fair way Jeffrey C Alexander's masterful work The Civil Sphere addresses this central paradox of modern life Feelings for others the solidarity that is ignored or underplayed by theories of power or self interest are at the heart of this novel inquiry into the meeting place between normative theories of what we think we should do and empirical studies of who we actually are Solidarity Alexander demonstrates creates inclusive and exclusive social structures and shows how they can be repaired It is not perfect it is not absolute and the horrors which occur in its lapses have been seen all too frequently in the forms of discrimination genocide and war Despite its worldly flaws and contradictions however solidarity and the project of civil society remain our best hope the antidote to every divisive institution every unfair distribution every abusive and dominating hierarchy This grand sweeping statement and rigorous empirical investigation is a major contribution to our thinking about the real but ideal world in which we all reside

Beyond NGO-ization Kerstin Jacobsson, Steven Saxonberg, 2016-04-15 The celebrations marking the 20th anniversary of the fall of the Berlin Wall provoked a debate on the outcomes of the transition process in the post communist countries including a debate on the functioning of civil society This provided a good opportunity for researchers to collect new data and revise the discourse on collective action and the dynamics of civil society in these countries Jacobsson and Saxonberg's collection of essays looks at social movements and their forms of mobilization and organization as well as action repertoires in relation to the social context and their success or failure The book meets an important need in the discourse on post communist social movements by going beyond the usual discourse about the weak and non participatory civil society in the post communist context This book gives a nuanced and updated view of social movements in post communist Europe by looking at the cases of relatively successful mobilization by examining groups that have often been neglected in the discourse on social movements and civil society including animal rights groups racist movements and non feminist family organizations and by giving a deeper analysis of the different strategies that civil society organizations and groups can use Rather than expecting social movements in post communist Europe to follow the same patterns and operate in the same fashion as in Western Europe this volume shows that a wider view of contentious action is needed in order to understand the variety of strategies employed by collective actors operating in this context

Global Ethics and Civil Society Darren

O'Byrne,2017-03-02 This detailed and timely volume examines the impact of global transformations on concepts of civil society Divided into two sections it evaluates changing notions of ethics and how these transformations are operationalized The first part deals with the theoretical aspects while the second examines the practical impact of the evolution of global ethics and norms on society Providing solid case studies this accessible volume contributes to the theoretical literature in the field and will prove a useful library reference work or graduate reader in the areas of globalization civil society ethics human rights citizenship and cosmopolitanism Decolonizing Civil Society in Mozambique Tanja Kleibl,2021-08-26 By demonstrating that Western conceptions of civil society have provided the framework for interpreting societies in the Global South Decolonizing Civil Society in Mozambique argues that it is only through a critical deconstruction of these concepts that we can start to re balance global power relationships both in academic discourse and in development practices Examining the exclusionary discourses framing the support for Western type NGOs in the development discourse often to the exclusion of local social actors this book dissects mainstream contemporary ideas about civil society and finds a new means by which to identify local forms of social action often based in traditional structures and spiritual discourses Outlining new conceptual ideas for an alternative framing of Mozambique s civil society Kleibl proposes a series of fresh theoretical issues and questions alongside empirical research moving towards a series of new policy and practice arguments for rethinking and decolonizing civil society in the Global South **Trust and Civil Society** F. Tonkiss,A. Passey,N. Fenton,L. Hems,2000-09-25 Trust and Civil Society offers an original and accessible analysis of the meaning of trust in a range of critical contexts voluntary organizations faith associations the economy the state and welfare environmental issues and charity Balancing theory with grounded analysis and drawing on interdisciplinary and international perspectives the book makes an important contribution to contemporary debates It will be of interest to academics students researchers and practitioners in a range of fields Portraits of 21st Century Chinese Universities: Ruth Hayhoe,Jun Li,Jing Lin,Qiang Zha,2012-12-03 This book examines the ways in which China s universities have changed in the dramatic move to a mass stage which has unfolded since the late 1990s Twelve universities in different regions of the country are portrayed through the eyes of their students faculty and leaders The book begins with the national level policy process around the move to mass higher education This is followed by an analysis of the views of 2 300 students on the 12 campuses about how the changes have affected their learning experiences and civil society involvement The 12 portraits in the next section are of three comprehensive universities three education related universities three science and technology universities and three newly emerging private universities The final chapter sketches the contours of an emerging Chinese model of the university and explores its connections to China s longstanding scholarly traditions **Civil Society, the Third Sector and Social Enterprise** Jean-Louis Laville,Dennis Young,Philippe Eynaud,2015-04-24 If the twentieth century was only focused on the complementarity and the opposition of market and state the twenty first century has now to deal with the prominence of the

third sector the emergence of social enterprises and other solidarity hybrid forms The concept of civil society organisations CSOs spans this diversity and addresses this new complexity The first part of the book highlights the organizational dimensions of CSOs and analyses the growing role of management models and their limits Too often the study of CSO governance has been centered on the role of the board and has not sufficiently taken into account the different types of accountability environments Thus the conversation about CSO governance rises to the level of networks rather than simple organizations per se and the role of these networks in setting the agenda in a democratic society In this perspective the second part emphasizes the institutional dimensions of CSO governance by opening new avenues on democracy First the work of Ostrom about governing the commons provides us new insights to think community self governance Second the work of Habermas and Fraser opens the question of deliberative governance and the role of public sphere to enlarge our vision of CSO governance Third the concepts of substantive rationality and economy proposed respectively by Ramos and Polanyi reframe the context in which the question can be addressed Lastly this book argues for a stronger intercultural approach useful for the renewal of paradigms in CSOs research This book has for objective to present a unique collective work in bringing together 33 authors coming from 11 countries to share perspectives on civil society governance and will be of interest to an international audience of researchers and policy makers *Race, Media, and the Crisis of Civil Society* Ronald N. Agnieszka Bron,Michael Schemmann,2001 Writing the story of democracy might seem like writing a story of success In more and more countries all over the world democracy has been established as the leading form of government However democracy also has a less positive and optimistic side Political scandals and corruption continue to shatter people s trust in its promises and institutions This brings us to the topic of active democratic citizenship and civil society Since the late 1980s these topics have continued to rise in importance in the fields of social and political sciences and their influence has yet to reach a peak In comparison civil society and citizenship remain relatively new topics for adult education dating to the beginning of the 1990s We also see that the respective national discourses within the different European countries differ immensely Whereas the discourse on adult education and active democratic citizenship is quite lively in Great Britain or in Poland in Germany there is only very little interest Civil Society Citizenship and Learning the second volume of the Bochum Studies in International Adult Education presents a variety of different perspectives on the topics of citizenship and civil society The goal of this book is to give an overview of the European discourse on citizenship and civil society as well as on the discourse in some selected countries Agnieszka Bron ist Professorin am Institut f r P dagogik der Universit t Bochum
