Bhaskar, 2022-08-02 Why has the flow of big world changing ideas slowed down A provocative look at what happens next at the frontiers of human knowledge The history of humanity is the history of big ideas that expand our frontiers from the wheel to space flight cave painting to the massively multiplayer game monotheistic religion to quantum theory And yet for the past few decades apart from a rush of new gadgets and the explosion of digital technology world changing ideas have been harder to come by Since the 1970s big ideas have happened incrementally recycled focused in narrow bands of innovation In this provocative book Michael Bhaskar looks at why the flow of big world changing ideas has slowed and what this means for the future Bhaskar argues that the challenge at the frontiers of knowledge has arisen not because we are unimaginative and bad at realizing big ideas but because we have already pushed so far If we compare the world of our great great great grandparents to ours today we can see how a series of transformative ideas revolutionized almost everything in just a century and a half But recently because of short termism risk aversion and fractious decision making we have built a cautious unimaginative world Bhaskar shows how we can start to expand the frontier again by thinking big embarking on the next Universal Declaration of Human Rights or Apollo mission and embracing change     **Uruguay in Transnational**
