A. S. Neill Richard Bailey,2013-07-18 *Human-Centred Education* Scherto Gill,Garrett Thomson,2017-01-06 Human Centred Education HCE radically rethinks the aims of education the nature of learning and the relationship between individuals in schools This accessible guide presents a HCE approach to schooling and includes a variety of rich pedagogical examples It provides practical suggestions as to how the approach might be adopted as a whole school initiative or else woven into particular aspects of existing school life including the curriculum classroom culture and feedback for learning This handbook also illustrates how holistic educational practices found in some alternative schools can be introduced fruitfully into the state educational system with step by step guidance on how to integrate HCE into teacher training and school governance HCE is more than a set of inflexible pedagogical prescriptions or a recipe of lesson plans It originates from the fundamental values of care positive relationships and well being National education policies tend to ignore deeper

educational processes such as the cultivation of qualities that are central to living meaningfully and well because they focus on measured high stakes academic performance HCE is an effective antidote to this and brings to the fore a more human centred approach without sacrificing academic standards Current secondary teachers members of school management and leadership teams as well as those currently undertaking teacher training will all benefit from reading this important book

Rethinking Citizenship Education Tristan McCowan, 2011-11-03 Rethinking Citizenship Education presents a fundamental

reassessment of the field Drawing on empirical research the book argues that attempting to transmit preconceived notions of citizenship through schools is both unviable and undesirable The notion of curricular transposition is introduced a framework for understanding the changes undergone in the passage between the ideals of citizenship the curricular programmes designed to achieve them their implementation in practice and the effects on students The leaps between these different stages make the project of forming students in a mould of predefined citizenship highly problematic Case studies are presented of contrasting initiatives in Brazil a country with high levels of political marginalisation but also significant experiences of participatory democracy These studies indicate that effective citizenship education depends on a harmonisation or seamless enactment of the stages outlined above In contrast provision in countries such as the UK and USA is characterised by disjunctures showing insufficient involvement of teachers in programme design and a lack of space for the construction of students own political understandings Some more promising directions for citizenship education are proposed therefore ones which acknowledge the significance of pedagogical relations and school democratisation and allow students to develop as political agents in their own right

Learner-centred Education in International Perspective Michele Schweisfurth, 2013

Is learner centred education appropriate for all societies and classrooms Learner centred education LCE is a travelling policy widely promoted by international agencies and national governments Arguments in favour of this pedagogical tradition refer to theories and evidence from cognitive psychology claiming that all learners can benefit equally from its judicious use Beyond the benefits to the individual however lie a set of assumptions about learner centred education as a foundation for the building of democratic citizens and societies suitable for economies of the future These promises have been questioned by critics who doubt that it is appropriate in all cultural and resource contexts and there is considerable evidence in the global South of perennial problems of implementation In the light of these debates is LCE still a good development bet This book provides an authoritative and balanced investigation of these issues exploring the contextual factors from global movements to local resourcing realities which have fuelled it as a discourse and affected its practice In the light of the theoretical underpinnings and research evidence the book addresses pressing questions to what extent is learner centred education a sound choice for policy and practice in developing countries And if it is a sound choice under which conditions is it a viable one The book is divided into three key parts Learner centred Education as a Global Phenomenon Learner centred Education in Lower and Middle income Countries Lessons and Resolutions This book provides a much needed fresh analysis of the concept and practice of LCE It will be valuable reading for academics and post graduates with a focus on comparative and international education along

with policy makers in developing countries and development agencies Education, Democracy and Development Clive Harber, Vusi Mncube, 2012-05-14 Education is often seen as the key agency in international development and poverty reduction. Frequently the emphasis is on the economic and social role of education in development. This book on the other hand is unusual in explicitly examining the political role of education in development. In particular it sets out the theories, evidence and arguments concerning the potential and actual relationships between education and democracy and critically explores the contradictory role of formal education in both supporting and hindering democratic political development. A key theme of the book is the importance of considering the type and nature of the education actually provided and experienced, what goes on inside the black box of education. Currently in developing countries and elsewhere this is often at odds with democratic principles but the book also provides many examples of successful democratic practice in schools in developing countries as well as discussing a detailed case study of South Africa where democratic change in education is a key aspect of the policy agenda.

Education Studies Stephen Ward, 2004-02-26 Written specifically for students on Education Studies degree courses yet also relevant for students on teacher training courses. *Education Studies: A Student's Guide* introduces a wide range of topics and issues from knowledge and learning and policy and schooling to the ways in which education is a force for change across the globe. The book is split into three comprehensive sections which challenge our assumptions about education. It explores a wide range of perspectives on education in different countries and cultures, provides critiques of current policies and practice and analyzes learning and the nature of knowledge itself. Specific topics covered include the global dimension in the curriculum, cultural and religious plurality in education, the effective teacher, gender and educational achievement, special educational needs and inclusion in mainstream schools, ICT and learning for the future, language power and education. With chapter summaries, questions for discussion and reflection and suggestions for further reading, *Education Studies: A Student's Guide* will be a valuable resource for all students of Education Studies as well as BEd and PGCE students.

Rethinking Secondary Education Scherto Gill, Garrett Thomson, 2014-01-14 This is a timely, accessible and engaging book of considerable intellectual stature, bold imagination and practical wisdom. Not only does it develop penetrating, elegant analyses of what is wrong with current state-controlled and alternative approaches to contemporary education, it also offers imaginative, practical suggestions for a more fulfilling, human-centred alternative. Professor Michael Fielding, Institute of Education, University of London, UK. With great sensitivity and force and in wonderfully clear prose, Scherto Gill and Garrett Thomson explore some fundamental questions about what we want from our education system and what we can expect from it. It is highly recommended for all who are interested in education, whether from a more theoretical point of view or from a more practical point of view. Professor Adrian W. Moore, Faculty of Philosophy, University of Oxford, UK. Could we have a system of secondary education that provides alternatives to the current mainstream schooling and its emphasis on exams, learning outcomes and the delivery of a fixed curriculum? How could such a system focus on both human and educational

values How could secondary education combine the personal development of students with good academic standards In response to these questions Gill and Thomson have written a new cutting edge text aimed at all those involved in the study of education or teacher training *Rethinking Secondary Education* explores debates and critiques new and alternative approaches to teaching young people today The book discusses a human centred approach to curriculum pedagogy assessment and the culture of schools and colleges It is grounded in theory and empirical research discussing the need for a curriculum for the future bridging a gap between mainstream and alternative education It also offers practical guidance on how these ideas can be put into practice making it an ideal resource for trainee teachers experienced practitioners and students of education alike Key features of the text A balanced approach comparing and contrasting both traditional and alternative approaches to education Strong grounding in theory and research The inclusion of young people s perspectives and voices on their education and on being an adolescent Links to practice showing how the theory and research can actually be put into practice to bring about change
