Back cover Breast Cancer: the Unplanned Journey Beverly Stacy Dittmer, 2011-09-29 **Live Strong** The Lance Armstrong Foundation, 2005-09-27

Survivors from all walks of life talk about what living strong in the face of cancer means to them. Since the now ubiquitous LIVESTRONG wristbands became available in May 2004, the Lance Armstrong Foundation has raised more than 50 million for cancer survivorship programs, and the signature phrase has become a battle cry for those who fight the disease every day. Now the Lance Armstrong Foundation has compiled from hours of videotaped interviews poignant and dramatic personal accounts from cancer survivors. Covering a wide range of subjects from grief to spousal relationships, employment discrimination to coping with medical bills, infertility to fear of recurrence, survivors share their experiences and speak candidly about how cancer has impacted their lives. For twenty-four-year-old Amy, it's how her illness changed her relationship with her parents. Mike, a male survivor of breast cancer, talks about gender stereotypes and genetic testing. And Eric, the father of a five-year-old survivor of a brain tumor, recalls how friends and strangers helped his family with financial issues and how the experience brought him and his wife closer together. While heartbreaking at times, these powerfully honest stories are ultimately uplifting and extremely reassuring to patients and their families. They offer the wisdom and hope that only survivors can give. LiveStrong is a remarkable testament to the resilience of the human spirit. From the introduction by Lance Armstrong: "My work with the LAF shows me daily that sharing our stories and learning from one another's experiences helps us cancer survivors continue to survive. Some people think the cancer experience is only about the diagnosis and treatment of cancer, as if after the disease goes into remission it no longer exists. But survivorship goes beyond remission. Survivorship is an evolution."

Rx for Hope Nick Chen, David Tabatsky, 2018-10-16 In our current era of rapidly developing cancer drugs and therapies we also see improvement of cancer treatment outcomes stagnating when it comes to determining quality of life or long term survival This is because while new treatments are making small incremental progress in outcomes most cancer patients still depend on conventional methods that are both toxic and ineffective While new cancer drugs are becoming more precise or targeted less attention is being paid to the overall health and wellbeing of the patient which we propose is essential for long term cancer control and improving a patient's quality of life Rx for Hope backed by rigorous science and real life patient cases calls for an urgent reevaluation of the current conventional approach to cancer treatments and encourages a progressive treatment model combining metronomic low dose chemotherapy with complementary integrative medicine Along with new breakthrough immunotherapy drugs these treatments can potentially create a response powerful enough to not only eradicate the presence of cancer but also to prevent it from returning Because every 23 seconds someone in America is diagnosed with cancer the number of people affected is growing rapidly The American Cancer Society estimates that nearly two million new patients will need treatment in the coming year Judging by current trends and methods of treatment far too many of these people will be treated without the benefits of low dose chemotherapy and even less will enjoy the positive impact of immune supportive complementary integrative medicine Rx for Hope offers insight into a powerful way of treating cancer that patients and doctors can implement immediately for optimal results
