State and Religion in the Arab World Khair El-Din Haseeb, 2017-12-22 This collection focuses on the controversial relationship between religion and the state within the Arab Spring context and the evolving debates on democratic transition In this book democracy is not questionable it is hailed by all those vocal on the political scene The array of opinions presented here varies from a call for a secular state based on Islamic philosophy to a call for setting democratic institutions before working on solving this religion state dichotomy Meanwhile some prefer to have an ambiguous stand on which side to back up the liberals or the Islamists despite a detailed criticism of the ossified ways of those calling for a religious state Al Majd The book starts with an analysis and a detailed account of how the sensitive issue of the relationship between state and religion developed in Arab thought and society and it goes on to employ less the religious discourse in presenting their positions thus focusing on actual cases of this struggle for power in different Arab countries such as Tunisia and Egypt The collection also provides insights and analysis of the ongoing debates and views on the role of religion in Libya and provides an analysis of the case of Morocco In addition to this there is a special chapter that deals with how Muslim communities living in the West adapt to secular state politics The collection ends with a thorough discussion by a number of Arab intellectuals and activists Muslims and Christians alike whereby core issues related to the debate on state and religion are presented This discussion in addition to reflecting the Islamist secular dichotomy demonstrates the richness of the ongoing debates that extend well beyond the discourse on this dichotomy This book is a compilation of articles published in Contemporary Arab Affairs

Hidden Powers of State in the Cuban Imagination Kenneth Routon, 2010-07-18 Despite its hard nosed emphasis on the demystifying realism of Marxist Leninist ideology the political imagery of the Cuban revolution and the state that followed conjures up its own magical seductions and fantasies of power In this fascinating account Kenneth Routon shows how magic practices and political culture are entangled in Cuba in unusual and intimate ways Routon describes not only how the monumentality of the state arouses magical sensibilities and popular images of its hidden powers

but he also explores the ways in which revolutionary officialdom has in recent years tacitly embraced and harnessed vernacular fantasies of power to the national agenda In his brilliant analysis popular culture and the state are deeply entangled within a promiscuous field of power taking turns siphoning the magic of the other in order to embellish their own fantasies of authority control and transformation This study brings anthropology and history together by examining the relationship between ritual and state power in revolutionary Cuba paying particular attention to the roles of memory and history in the construction and contestation of shared political imaginaries

Making War on the World Mark Shirk, 2022-03-01 The state bounds politics it constructs and enforces boundaries that separate what it controls from what lies outside its domain However states face a variety of threats that cross and challenge their geographical and conceptual boundaries Transnational violent actors that transcend these boundaries also defy the state's claims to political authority and legitimacy Mark Shirk examines historical and contemporary state responses to transnational violence to develop a new account of the making of global orders He considers a series of crises that plagued the state system in different eras golden age piracy in the eighteenth century anarchist propagandists of the deed at the turn of the twentieth and al Qaeda in recent years Shirk argues that states redraw conceptual boundaries such as between international and domestic to make sense of and defeat transnational threats In response to forms of political violence that challenged boundaries states developed creative responses that included new forms of control surveillance and rights As a result these responses gradually made and transformed the state and global order Shirk draws on extensive archival research and interviews with policy makers and experts and he explores the implications for understandings of state formation Combining rich detail and theoretical insight **Making War on the World** reveals the role of pirates anarchists and terrorists in shaping global order

Annali della Fondazione Giangiacomo Feltrinelli (2002). State, power, and new political actors in postcolonial Africa. Ediz. inglese e francese Alessandro Triulzi, Maria Cristina Ercolessi, 2004 Constitutional Law, Religion and Equal Liberty Azin Tadjini, 2019-09-19 During the 20th century many countries embarked on a process of constitutional

secularization by which the role of religion gradually became limited Yet by the late 20th century and increasingly following the end of the Cold War this development began to be challenged This book examines the return of religion in constitutions through the concept of constitutional de secularization It places this phenomenon in the context of the constitutional memory of the countries in which it has taken place and critically examines it against the development and standards of constitutionalism as the prevailing constitutional legal and political theory Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty that is both the regulation of constitutional rights and the scope for equality of those who are granted such rights The book argues that equal liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights

Turkey in the 21st Century Erik Cornell, 2014-01-02 Answers the questions what is the background to issues in external and internal politics What is the Turks opinion on European and Turkish identity On Cyprus On the role of the generals Why do human rights problems linger on What is behind the Kurdish question Is Turkey religiously split What are the pros and cons of Turkish association with the EU , The Illusion of Eternal Religious Law Joseph The Monotheist, 2024-09-22 This book is the third in a series that presents an attempt to understand the Qur'anic revelation published concurrently with the first and second volumes It continues on the work presented in the first two volumes of this series to propose a new interpretation of the Qur'anic revelation that is claimed to constitute a more accurate representation of the revelation The first three volumes of this series argue that the religion of Islam or rather the numerous interpretations of Islam are unacceptable representations of the Qur'anic revelation The proposed interpretation of the Qur'anic revelation challenges the standpoints of Traditional Islam on three key issues inclusiveness the sources of religious knowledge and the composition of any acceptable Qur'anic based interpretation of religion Each of the first three volumes of this series is dedicated to one of these topics respectively In this book the stance of the proposed interpretation of the Qur'anic revelation on law is addressed This position will prove to be of special significance particularly in the context of modernity and the modern state Furthermore Islamic law and its relationship to the religion of Islam is explored The proposed interpretation of the Qur'anic revelation does not see religion to be the source of law but rather it sees religion to be a source of ethics It sees that any acceptable interpretation of religion that is based on revealed scripture should have no law component It rejects religious law altogether and calls for the implementation of secular law In consequence the proposed interpretation of the Qur'anic revelation would be redefining the role of religion and its domain of operation What Islam is the book talking about Is it one Islam that around one quarter of the world's population follows Are all of the

commands in the Qur'an of eternal applicability What is Islamic law commonly referred to as Shari'a Why study Islamic law and why is it important to study it Is there only one Islamic law How does Islamic law relate to Islam Why does this book call for comprehensive religious reform and not religious law reform These questions and a multitude of others are addressed in this volume of the series This book is self-contained It can be read as part of the series or independently It does not require the reader to have previous knowledge in any of the topics discussed The book discusses topics you do not find in your typical book about the Qur'an or Islam It would interest those who want to learn about the Qur'an its message and Islamic law Among this group would be those searching for a reformed understanding of the Qur'an and how it applies today those interested to learn about Islamic law what it is and what it is not and those interested in monotheistic religions in general This book will prove to be particularly useful to those seeking to understand the problems in the contemporary interpretations of Islam and consequently how such problems reflect on the Muslim individual and societies in general
