Religion in Third World Politics Jeffrey Haynes, 1994-01 Religion as reflected in the Iranian Revolution of 1978 1980 the rapid growth of evangelical Protestantism in Latin America and the triumph of the mujahidin in Afghanistan in 1992 has assumed great political significance in a number of Third World contexts This book examines the positions of the two global religions Islam and Christianity within the context of Third World political change since the 1970s Haynes addresses the topic thematically drawing parallels among different religions cultures political systems and geographical areas He concludes by noting that religion and politics throughout the Third World never became divorced despite assumptions to the contrary The recent resurgence of religion in politics is in a sense a return to

basics albeit within a rapidly changing set of global circumstances BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Religion in International Politics and Development J. A. Rees, 2011 This unique and fascinating book illustrates that in moving the research agenda forward despite whatever methodological pitfalls that may await in the attempt the dynamics of religion must now be considered to be of central and abiding importance in the study of world politics An illuminating case study of the World Bank's engagements with religion faith communities institutions and social movements provides insights into the current discourse on religion in international relations John A Rees argues that religion is of equal importance to other structures of international relations IR and questions where religion is operating in world politics rather than what religion is in an essential sense He constructs a new model for differentiating three distinct discourses of religion in the theory and practice of world politics which he applies to the IR sphere of international development and encourages new thinking in the field by answering conceptual and methodological challenges in religion research This book will prove an enlightening point of reference for academics and researchers in the fields of religion world politics international relations and development studies as well as for international organisations development theorists and practitioners working in conjunction with faith based organisations

Religion, Globalization and Political Culture in the Third World Jeff Haynes, 2016-07-27 A unique focus on the relationship between religion and political culture in the Third World using a comparative and thematic approach Specific issues of religion politics interaction in the Third World in recent times include the rise of Islamic fundamentalist groups throughout the Middle East and other parts of the Muslim world the political effects of the decline of Catholicism and the rapid growth of Protestant evangelical sects in Latin America communal conflict between Hindu nationalist groups and the politicisation of Buddhism in South East Asia The common effect of such developments is to challenge existing forms of relationship between states and societies with religion used as a political resource

Religion in Third World Politics Jeffrey Haynes, 1993-01-01 Religion as reflected in the Iranian Revolution of 1978 1980 the rapid growth of evangelical Protestantism in Latin America and the triumph of the mujahidin in Afghanistan in 1992 has assumed great political significance in a number of Third World contexts This book examines the positions of the two global religions Islam and Christianity within the context of Third World political change since the 1970s

Scriptures, Shrines, Scapegoats, and World Politics Zeev Maoz, Errol A Henderson, 2020-03-19 The effect of religious factors on politics has been a key issue since the end of the Cold War and the subsequent rise of religious terrorism However the systematic investigations of these topics have focused primarily on the effects of religion on domestic and international conflict *Scriptures Shrines Scapegoats and World Politics* offers a comprehensive evaluation of the role of religion in international relations broadening the scope of investigation to such topics as the relationship between religion and cooperation religion and conflict and the relationship between religion and the quality of life Religion is often manipulated by political elites to advance their principal goal of political survival Zeev Maoz and Errol A Henderson find that

no specific religion is either consistently more bellicose or consistently more cooperative than other religions However religious similarity between states tends to reduce the propensity of conflict and increase the opportunity for security cooperation The authors find a significant relationship between secularism and human security *Democracy and Civil Society in the Third World* Jeffrey Haynes, 2013-06-28 This book provides an accessible account of popular political social and economic movements in the Third World Focusing on poor and marginalized groups within developing countries it shows how these groups have been stimulated into action by recent demands for political and economic change Haynes describes the growing interest in democratic change in the Third World during the 1980s and 1990s and argues that demands for democracy human rights and economic change were a widespread catalyst for the emergence of hundreds of thousands of popular movements in Latin America Africa and Asia Sometimes these took the form of demands for more political representation and greater economic development others were concerned with environmental protection the broad position of women and the establishment of Islamic states and societies Haynes argues that these emerging popular organizations are best regarded as building blocks of civil society that in time will enhance the democratic nature of many political environments in the Third World The book will be welcomed by students and researchers in development studies politics and sociology *Meaning and International Relations* Peter Mandaville, Andrew Williams, 2015-04-15 This innovative volume brings together specialists in international relations to tackle a set of difficult questions about what it means to live in a globalized world where the purpose and direction of world politics are no longer clear cut What emerges from these essays is a very clear sense that while we may be living in an era that lacks a single universal purpose ours is still a world replete with meaning The authors in this volume stress the need for a pluralistic conception of meaning in a globalized world and demonstrate how increased communication and interaction in transnational spaces work to produce complex tapestries of culture and politics Meaning and International Relations also makes an original and convincing case for the relevance of hermeneutic approaches to understanding contemporary international relations *Religion and the Realist Tradition* Jodok Troy, 2013-09-11 This volume picks up a rather uninvested field of international relations theory the influence of religion on Realism as well as the power of Realism to address religious issues in world politics Although classical scholars of Realism rarely mention religion explicitly in their well known work this volume suggests that Realism offers serious ground for taking religion and faith into account as well as evaluating the impact of religion on its theoretical framework how religion and religious worldviews influence and affect the theoretical framework of Realism and how Realism approach religious issues in international relations as a relatively new field of international studies Although international relations scholars now widely deal with issues of religion large portions of the theoretical underpinning are missing In addressing this lack the volume illustrates the possibility of reform and change in Realism Furthermore the chapters reach out to normative statements The contributors offer a theoretical view on religion in international relations in the context of Realism but always connect this

with actual real world related political problems The volume takes into account not only classical thinkers and approaches of Realism but also present day authors dealing with ethical and normative questions of international relations in the aftermath of 9 11 Offering a fresh perspective on the influence of religion on international relations theory this work will be of great interest to scholars of religion and international relations international relations theory and political philosophy

Relations and Religion Jeffrey Haynes,2014-04-23 Not so very long ago it seemed reasonable to assert that the influence of religion on global politics was on the wane As the Western world became increasingly secular and the process of globalisation deepened it seemed inevitable on the surface at least that the voice of religion was to be heard softly if it was to be heard at all This has now changed and changed perhaps irrevocably As Jeff Haynes argues in this thought provoking and important new book various religious actors are now significantly involved in international relations and have become a crucial influence on policy in a post Westphalian world International Relations and Religion guides the reader through the

complex issues at the heart of this topic with clarity and insight This updated second edition starts with a close reading of the many theoretical and analytical concepts notably Huntington and the clash of civilisations that have grown up around this area and then concludes with a summary of the issues under discussion and attempts to put into context what it means to live in a world that is increasingly shaped by a whole host of diverse religious groups Essential reading for students of International Relations and Politics

Religious NGOs in International Relations Karsten Lehmann, 2016-01-29 Over the last 30 years non governmental organizations NGOs have become increasingly present in international discourses and active in international decision making Among the estimated several million NGOs in existence today an increasingly visible number of organizations are defining themselves in religious terms referring to themselves as religious spiritual or faith based NGOs This book documents the initial encounters between the particularly international segment of those organizations and the UN while at the same time covering the Protestant and Catholic spectrum that dominated the early years of their activities in the UN context This book focuses on the construction of the human rights discourse inside two religiously affiliated organizations The Commissions of the Churches on International Affairs CCIA and Pax Romana IMCS ICMICA These organizations have been formally accredited as NGOs by the UN label themselves as religious and look back upon a long and intense cooperation with the UN Lehmann presents material from the archives of those two organizations that has so far rarely been used for academic analysis In doing so as well as documenting the encounters between those organizations and the UN and looking at the Protestant and Catholic spectrum the book provides new insights into the very construction of the notions of the religious and the secular inside those organizations This work will be of great interest to all students of religion and international relations and will also be of interest to those studying related subjects such as global institutions comparative politics and international politics
