*Sexuality* Nina Hoel, Melissa Wilcox, Liz Wilson, 2020-09-10 How does religion relate to bodies and sexualities Many people would answer simply through repression but the relationship is much more complicated than that While many religions draw boundaries between what they consider to be appropriate and inappropriate use of the human body especially in the realm of sexuality the same religions often celebrate human sexuality and even expect sexual partners to provide each other with sexual pleasure Celibacy too is more than just repression and sometimes it is even seen as providing the practitioner with great spiritual power in other settings the sex act itself is understood to provide this power Religion the Body and Sexuality offers students and general readers a sophisticated and accessible exploration of the connections between religion sexuality and the body through case studies and overviews in the following thematic chapters Celibacy Regulation Controversy Violence Innovation Instrumentalization Ecstasy Each chapter includes suggestions for further reading questions for further thought and a list of relevant media resources This engaging book is an excellent addition to introductory courses on religion or sexuality and is a much needed new volume for advanced courses on the intersections of these areas of human experience

Fitzgerald, Ashley John Moyse, 2019-05-09 Modern medicine has produced many

wonderful technological breakthroughs that have extended the limits of the frail human body. However, much of the focus of this medical research has been on the physical, often reducing the human being to a biological machine to be examined, understood, and controlled. This book begins by asking whether the modern medical milieu has overly objectified the body, unwittingly or not, and whether current studies in bioethics are up to the task of restoring a fuller understanding of the human person. In response, various authors here suggest that a more theological, religious approach would be helpful or perhaps even necessary. Presenting specific perspectives from Judaism, Christianity, and Islam, the book is divided into three parts: Understanding the Body, Respecting the Body, and The Body at the End of Life. A panel of expert contributors, including philosophers, physicians, and theologians and scholars of religion, answer key questions such as: What is the relationship between body and soul? What are our obligations toward human bodies? How should medicine respond to suffering and death? The resulting text is an interdisciplinary treatise on how medicine can best function in our societies. Offering a new way to approach the medical humanities, this book will be of keen interest to any scholars with an interest in contemporary religious perspectives on medicine and the body.

**The Concept of Body in Judaism, Christianity and Islam** Christoph Böttigheimer, Konstantin Kamp, 2023-12-18. This volume of the series Key Concepts in Interreligious Discourses investigates the roots of the concept of body in Judaism, Christianity, and Islam. The body and being a created being stand in the focus of all the three major monotheistic faiths. It is not just by the Christian idea of man's likeness to God that indicates that the human body is a central object of religious thinking, both culturally and theologically charged. Here the body stands in the crossfire of terms like pure and unpure, sacred and profane, male and female. And besides the theological controversies, everyday experiences like sexuality, gender equality, and how to dispose of the own body and that of others are undoubtedly recent and highly contentious discussion points in the debate of a peaceful living together of different religions and cultures. The volume presents the concept of body in its different aspects as anchored in the traditions of Judaism, Christianity, and Islam. It unfolds commonalities and differences between the three monotheistic religions as well as the manifold discourses about peace within these three traditions. The book offers fundamental knowledge about the specific understanding of the body in each one of these traditions, their interdependencies, and their relationship to secular world views.
