Religion And The Human Image:

Religion and the Human Image Carl A. Raschke, James A. Kirk, Mark C. Taylor, 1977 Religion and the Human Image traces major religious philosophies to show how each is a mirror of man It explores religion as a set of symbols of images which reveal various aspects of human life throughout history It shows how to interpret the clues that give significance to the human situation The book discusses how the human image is depicted in the religion of ancient Israel in early Christianity in classical Hinduism and Buddhism and in the traditional religious cultures of China and Japan It concludes with two strong chapters that deal with the disintegration of traditional religious images under the impact of rapid social change and secularization during the past one hundred and fifty years the text concludes with an examination of recent trends in religion which seem to point toward the recovery of a new understanding of the human condition The material presents key traditions rather than covering everything about all religions although the introductory chapter summarizes and critically analyzes the various theories of religion in general It integrates the historical approach to religion with sociology psychology philosophy and theology Publisher

Religion and the Order of Nature Seyyed Hossein Nasr, 1996-09-26 The current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts In this book Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that has been advanced by modern secular science What is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans His goal is to negate the totalitarian claims of modern science and to re open the way to the religious view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth

The Human Image of God Hans-Georg Ziebertz, Friedrich Schweitzer, Hermann Häring, Don Browning, 2021-10-01 A new wave of religious energy is sweeping through the western nations Although God is disappearing from religious discourse in western culture both as a word and as a concept there is a definite undercurrent of religious ardour which is growing in strength It focuses all the more attention on the issue what or who is God in the modern era This is the question examined through systematic studies practical theology and empirical research that are presented here through anthropologically relevant theology Renowned international authors make it plain in this book the question of God is exciting again This book is published in honour of

years there has been an explosion in the market for fiction on religious topics and themes most notably Dan Brown's *The Da Vinci Code*. The variety of contemporary religious fiction and the publishing phenomenon surrounding it indicate that this literature transcends any overt religious meaning and is significant in its political and social implications; it is emblematic of the contemporary American Zeitgeist. Traditionally, literature is both mirror and lamp, reflecting the society that produces it and illuminating the values and interests of that society. Recognizing both of those perspectives, Gandolfo examines Christian literature's place in American culture today and explores the cultural meaning and significance of the wildly popular Christian fiction now available. The phenomenon surrounding Dan Brown's *The Da Vinci Code* has led to a cottage industry of interpretations, attacks, and commentaries, but one thing is certain: the book has had an enormous impact on American society, culture, and religious understanding, not to mention the publishing industry, which scrambles to find similar religious books to feed to an eager public. But *The Da Vinci Code* is not the only book of its type on the market today. In recent years, there has been an explosion in the market for fiction on religious topics and themes, with an entire series devoted to the impending Rapture as described in the *Left Behind* series. Some fiction does not take an explicitly religious theme as these books do. Instead, writers like Andre Dubus and Ron Hansen imbue their creative work with spiritual and religious themes embedded in the everyday lives and concerns of their characters. Regardless of the specific approach, what is not in doubt is that American readers have made the authors of these works wealthy, as bookstores cannot stock their shelves with enough copies. Why the recent surge of interest in Christian fiction? How does it reflect trends in our culture and our lives? How has it changed our society and our understanding of spirituality and religion? How accurate are these books in terms of the theology they espouse? The variety of contemporary religious fiction and the publishing phenomenon surrounding it indicate that this literature transcends any overt religious meaning and is significant in its political and social implications; it is emblematic of the contemporary American Zeitgeist. Traditionally, literature is both mirror and lamp, reflecting the society that produces it and illuminating the values and interests of that society. Recognizing both of those perspectives, Faith and Fiction examines Christian literature's place in American culture today and explores the cultural meaning and significance of the wildly popular Christian fiction now available.
