A History of Theory and Method in the Study of Religion and Dance Kimerer L. LaMothe, 2018-10-22 The relationship between religion and dance is as old as humankind. Contemporary methods for studying this relationship date back a century. The difference between these two time frames is significant: scholars are still developing theories and methods capable of illuminating this vast history that take account of their limited place within it. *A History of Theory and Method in the Study of Religion and Dance* takes on a primary challenge of doing so, overcoming a conceptual dichotomy between religion and dance forged in the colonial era that justified western Christian hostility towards dance traditions across six continents over six centuries. Beginning with its enlightenment roots, LaMothe narrates a selective history of this dichotomy, revealing its ongoing work in separating dance studies from religious studies. Turning to the Bushmen of the African Kalahari, LaMothe introduces an ecokinetic approach that provides scholars with conceptual resources for mapping the generative interdependence of phenomena that appear as dance and/or religion.

World Religions in America, Fourth Edition Jacob Neusner, 2009-10-07 The fourth edition of *World Religions in America* continues its lauded tradition of providing students with reliable and nuanced information about America's religious diversity while also reflecting new developments and ideas. Each chapter was updated to reflect important changes and events and current statistics and information. New features include a timeline of key events and people for each tradition, sidebars on major movements or controversies, personal stories from members of various faiths, a theme-based organization of subjects, more subheads, three new chapters exploring America's increasing religious diversity, and suggestions for further study.

Religions as Brands Jean-Claude Usunier, Jörg Stolz, 2016-04-01 During the twentieth century, religion has gone on the market place. Churches and religious groups are forced to sell God in order to be attractive to religious consumers. More and more religions are seen as brands that have to be recognizable to their members and the general public. What does this do to religion? How do religious groups and believers react? What is the consequence for society as a whole? This book brings together some of the best international specialists from marketing, sociology, and economics in order to answer these and similar questions. The interdisciplinary book treats new developments in three fields that have hitherto evolved rather independently: the commoditization of religion, the link between religion and consumer behavior, and the economics of religion. By combining and cross-fertilizing these three fields, the book shows just what happens when religions become brands.

Religions and the Truth Hendrik M. Vroom, 1990

Ethics, Religion, and the Good Society Joseph Runzo, 1992-01-01 People living in a pluralistic age are aware of diversity among themselves and consider it both natural and enriching for humankind. However, there are many disagreements that create ethical questions on the nature of human good, religion, and public morality, and more. Joseph Runzo, with the help of a diverse group of contributors, skillfully deals with these ethical issues.

Conceptualizing Religion Saler, 1993-03-01 How might we transform a folk category in this case religion into an analytical category suitable for cross cultural research In addressing that question this book critically explores various approaches to the problem of conceptualizing religion for scholarly purposes particularly with respect to certain disciplinary interests of anthropologists The author argues that the most plausible analytical strategy can be based on the idea of family resemblances especially as that idea has been used and developed in contemporary prototype theory In the

solution proposed religion is conceptualized as an affair of more or less rather than a matter of yes or no and no sharp line is drawn between religion and non religion

Peacemaking and Religious Violence Roger A. Johnson, 2009-09-01 From its very beginning Christian faith has been engaged with religious violence The first Christians were persecuted by their co religionists and then by imperial Rome Jesus taught them in such circumstances not to retaliate but to be peacemakers to love their enemies and to pray for their persecutors Jesus's response to religious violence of the first century was often ignored but it was never forgotten Even during those centuries when the church herself persecuted Christian heretics Jews and Muslims some Christians still struggled to bear witness to the peace mandate of their Lord In the thirteenth century Thomas Aquinas wrote a theology to help his Dominican brothers persuade Cathar Christians to return to their Catholic faith peacefully Ramon Lull a Christian student of Arabic and the Qur'an sought to help his fellow Christians recognize the elements of belief they shared in common with the Muslims in their midst In the fifteenth century Nicholas of Cusa a Church Cardinal and theologian expanded Lull's project to include the newly discovered religions of Asia In the

seventeenth century Lord Herbert an English diplomat and lay Christian began to identify the political union of church and government as a causal factor in the religious warfare of post Reformation Christendom One and a half centuries later Thomas Jefferson a lay theologian of considerable political stature won a political struggle in the American colonies to disestablish religion first in his home colony of Virginia and then in the new nation he helped to found All five of these theologians reclaimed the peace mandate of Jesus in their response to the religious violence of their own eras All of which points us to some intriguing Christian responses to religious violence in our own century as recounted in the epilogue
