The Mid-Victorian Generation K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation

The Churches and the Working Classes Patricia Midgley, 2012-12-21 Contrary

to our perception of the centrality of the churches in English life in the nineteenth century the disappointing results of the 1851 Religious Census led religious leaders to seek a variety of ways to increase religious allegiance as the century progressed The apparent apathy and lack of interest in formal religion on the part of the working classes was particularly galling and the various denominations tried hard to attract them through evangelical missions as well as social and charitable ventures which sometimes competed with religious concerns to the latter's detriment This book traces the motivations concerns and efforts of the churches particularly in the period between 1870 and 1920 and the ambivalent responses of ordinary people The Education Act of 1870 led to the churches losing their hold on the education of the young a consequence foreseen by many church leaders but unable to be prevented By 1920 it was apparent that the churches' optimism regarding an increased role with a war-weary population would not be fulfilled The focus is on the city of Leeds representative of the industrialised urban areas with burgeoning populations which proved to be such a challenge to the churches at the same time stimulating them to ever greater efforts

Atlas of British Social and Economic History Since c.1700 Mr Rex Pope, Rex Pope, 2002-03-11 All students of history use maps This atlas is designed specifically to enhance the understanding of British history since 1700 as well as emphasizing social as well as economic change The contributors are all subject specialists who have taught in higher education institutions and a large proportion of both maps and text is based on their own original research The combination of maps and text is intended to illustrate not only historical developments such as the spread of agriculture or the growth of an integrated transport system but also regional contrasts at points in time The end product offers support for those historians who question the usefulness of thinking in terms of national economic histories

The Decline of Christendom in Western Europe, 1750-2000 Hugh McLeod, Werner Ustorf, 2003-07-17 Christendom lasted for over a thousand years in Western Europe and we are still living in its shadow For over two centuries this social and religious order has been in decline Enforced religious unity has given way to increasing pluralism and since 1960 this process has spectacularly accelerated In this 2003 book historians sociologists and theologians from six countries answer two central questions what is the religious condition of Western Europe at the start of the twenty-first century and how and why did Christendom decline Beginning by overviewing the more recent situation the authors then go back into the past tracing the course of events in England Ireland France Germany and the Netherlands and showing how the fate of Christendom is reflected in changing attitudes to death and to technology and in the evolution of religious language They reveal a pattern more complex and ambiguous than many of the conventional narratives will admit

Between Cross and Class Lex Heerma van Voss, Patrick Pasture, Jan de Maeyer, 2005 In the late nineteenth century in a number of continental European countries Christian associations of workers arose Christian trade unions workers cooperatives political leagues workers youth movements and cultural associations sometimes separately for men and women In some countries they formed a unified Christian labour movement which sometimes also belonged to a broader Christian subculture or pillar encompassing all social classes In traditional labour history Christian workers organizations were solely represented as dividing the working class and weakening the class struggle However from the 1980s onwards a considerable amount of studies have been devoted to Christian workers organizations that adopted a more nuanced approach This book takes stock of this new historiography To broaden the analysis each contribution compares the development in at least two countries thus generating new comparative insights This volume assesses the development of Christian workers organizations in Europe from a broad historical and comparative perspective The contributions focus on the collective identity of the Christian workers organization their denominational and working class allegiances and how these are expressed in ideology organization and practice Among the themes discussed are relations with churches and Christian Democracy secularization the development of the Welfare State industrial relations and the contribution to working class culture This volume is the result of a joint intellectual enterprise of the International Institute of Social History IISG in Amsterdam Netherlands and a group of scholars linked to the KADOC Documentation and Research Centre for Religion Culture and Society of the KU Leuven Catholic University Leuven Belgium

The Forging of the Modern State Eric J. Evans, 2018-07-16 In what has established itself as a classic study of Britain from the late eighteenth century to the mid Victorian period Eric J Evans explains how the country became the world's first industrial nation His book also explains how and why Britain was able to lay the foundations for what became the world's largest empire Over the period covered by this book Britain became the world's most powerful nation and arguably its first super power Economic opportunity and imperial expansion were accompanied by numerous domestic political crises which stopped short of revolution The book ranges widely across key political diplomatic social cultural economic and religious themes in order to convey the drama involved in a century of hectic but generally constructive change Britain was still ruled by wealthy landowners in 1870 as it had been in 1783 yet the society over which they presided was unrecognisable Victorian Britain had become an urban industrial and commercial powerhouse This fourth edition coming more than fifteen years after its predecessor has been completely revised and updated in the light of recent research It engages more extensively with key themes including gender national identities and Britain's

relationship with its burgeoning empire Containing illustrations maps an expanded Framework of Events and an extensive Compendium of Information on topics such as population change cabinet membership and significant legislation the book is essential reading for all students of this crucial period in British history Church and State in Modern Britain 1700-1850

Richard Brown,2002-01-04 In this the second part of his history of the Industrial Revolution Richard Brown examines the political and religious developments which took place in Britain between the 1780s and 1840s in terms of the aristocratic elite and through the expression of alternative radical ideologies Opening with a discussion of the nature of history and of Britain in 1700 it goes on to consider Britain s foreign policy the emergence of the modern state and the mid century crisis of the 1840s Unlike many previous works it emphasises British not just English history It is this diversity of experience and the focus on continuity as well as change women as well as men that makes this a distinctive text Students will also find the theoretical foundations of historical narrative and analysis clearly explained **Britain in the Nineteenth Century**

Devil's Kingdom Down Pamela J. Walker,2001-04-02 Those people in uniforms who ring bells and raise money for the poor during the holiday season belong to a religious movement that in 1865 combined early feminism street preaching holiness theology and intentionally outrageous singing into what soon became the Salvation Army In Pulling the Devil s Kingdom Down Pamela Walker emphasizes how thoroughly the Army entered into nineteenth century urban life She follows the movement from its Methodist roots and East London origins through its struggles with the established denominations of England problems with the law and the media and public manifestations that included street brawls with working class toughs The Salvation Army was a neighborhood religion with a battle plan especially suited to urban working class geography and cultural life The ability to use popular leisure activities as inspiration was a major factor in the Army s success since pubs music halls sports and betting were regarded as its principal rivals Salvationist women claimed the right to preach and enjoyed spiritual authority and public visibility more extensively than in virtually any other religious or secular organization Opposition to the new movement was equally energetic and took many forms but even as contemporary music hall performers ridiculed the Hallelujah Lasses the Salvation Army was spreading across Great Britain and the Continent and on to North America The Army offered a distinctive response to the dilemmas facing Victorian Christians in particular the relationship between what Salvationists believed and the work they did Walker fills in the social cultural and religious contexts that make that relationship come to life **Democratisation in Britain** John Garrard,2017-05-01 Democratisation

in Britain is a novel reinterpretation of British social and political history since 1800 in light of the continuing debate about democratisation. As such, the book goes far beyond standard histories of political reform. In common with the politics in Northern Europe, North America and Australasia, Britain's democratisation began early and in highly favourable circumstances. The process took place in stages, only half consciously and in the context of a generally benign economic cycle. The country possessed a vibrant civil society at most levels of its adult population along with a flexible, competitive and opportunistic set of political elites. Partly as a result, the popular expectations and demands released by democratisation were modest and untroublesome. Countries undergoing democratisation since 1918 have been far less fortunate and the process is thereby much more difficult. Thus this book may be seen as portraying an ideal type against which to compare and contrast these later experiences. Democratisation in Britain combines the disciplines of political science and history and will be of interest to scholars and students in both fields.
