Religious Diversity—What's the Problem? Rita M. Gross, 2014-04-24 Once upon a time on grounds of both religion and common sense people assumed that the earth was flat and that the sun literally rose and set each day When newly developing knowledge made those beliefs untenable giving them up was difficult Today the belief that only one of the world's various religions is true for all people on earth is equivalent to the belief in a flat earth Both notions have become untenable given contemporary knowledge about religion Even though many people are still troubled by the existence of religious diversity today that diversity is a fact of life Religious diversity should be no more troubling to religious people than the fact that the earth is round and circles the sun This provocative book based on the author's longtime practice of Buddhism and comparative study of religion provides tools with which one can truly appreciate religious diversity as a gift and resource rather than as a deficiency or a problem to be overcome After we accept diversity as inevitable and become comfortable with it diversity always enriches life both nature and culture

Libraries, Classrooms, and the Interests of Democracy John Buschman, 2012-07-30 Library marketing and advertising in schools are now very widespread practices Since libraries and schools have been strongly linked to economic performance adopting marketing and advertising techniques into them is often seen as a natural extension of that linkage But should that be the case John Buschman argues that as we shape and guide our educative institutions we should carefully consider the consequences In *Libraries Classrooms and the Interests of Democracy* Marking the Limits of Neoliberalism Dr Buschman details the connections between our educative institutions and democracy and the resources within democratic theory reflecting on the tensions between marketing advertising consumption and democracy Drawing on wide scholarship to explore some of the history of democratic

theory and its intertwinements with capitalism the author helps the reader think about how democracies can deal with the challenges of this current historical phase The complex arguments of de Tocqueville Dewey Marx and many others help clarify how the market has pierced classrooms and libraries with advertising and marketing and why this is of concern in the interests of democracy In this volume Buschman provides a history of marketing and advertising and their entanglements with democracy education and libraries He then engages Democratic Theory and the framework it provides to critique neoliberalism s influences A final chapter traces the trajectory of neoliberalism and educative institutions on our democracy Throughout the book makes clear that issues concerning public educative institutions in a democracy are political A provocative and engaging book Libraries Classrooms and the Interests of Democracy should be required reading for anyone interested in the challenges facing libraries today
