Christian or secular settings The Perception of Christianity as a Rational Religion in Singapore Clive S. Chin, 2017-03-23
This book evaluates the common criticism that Christianity in Asia is westernized Since the 1980s Asian evangelical theologians and missiologists argue that the intrusion of Western theology is responsible for the Western and hence alien expressions of Christianity in Asia Yet in Singapore the number of Christians has increased over the last few decades Empirical evidence demonstrates that younger Chinese Singaporeans convert from Buddhism or Taoism to Christianity partly because they perceive it as a rational religion over Buddhism or Taoism which are viewed as irrational or superstitious Not only do many converts favor Christianity as a rational religion but they do not regard Christianity as a Western religion at the point of their conversion What accounts for those recent developments This study explores the processes of modernization and globalization as important factors impacting religious change in Singapore Personal contextual and structural elements actually influence one's religion of choice In facilitating effective mission one must qualify the use of the categories Asian and Western because religious and cultural boundaries overlap What matters most in missiology is discerning how the gospel of Jesus Christ engages the self understanding and lived realities of ethnic and religious others in diverse cultural settings

World History Kathy Sammis, 2002-09 **Reconciling Islam, Christianity and Judaism** Terence Lovat, Robert Crotty, 2015-02-23 At the present time when so called Islamic radicalism terrorism and Jihadism occupy major media space with Islam often depicted as the main culprit the book attempts a tour de force It proposes that Islam is as much victim as culprit in the history that has led to the current hostility This is because the common claims of both mainstream and radical Islam that Islam represents the high point of the Abrahamic tradition and therefore a purification of Judaism and Christianity have been largely ignored misunderstood or blatantly rejected by these faiths and therefore by the West in general This rejection has effectively rendered Islam as the poor cousin if not the illegitimate sibling of the tradition In turn this has created long term resentment and hostility within Islam as well as robbed the Judaeo Christian West of a rich inter faith understanding of the wider Abrahamic tradition The book explores these claims through textual historical and theological analyses proposing that many of them stand up better to critical scrutiny than has been commonly acknowledged It further proposes that seeing Islam in this way has potential to re awaken its self understanding as a leader of accord among the Abrahamic faiths of the kind that characterized the era of Convivencia when in medieval Spain Islam constructed and

contributed to advanced civilizations characterized by relatively harmonious co existence between Muslims Christians and Jews The book focuses on the role that a more respected and self confident Islam could play in forging enhanced inter faith relations in a world that desperately needs them as it struggles to understand and deal with modern and particularly vicious forms of radical Islamism

Christianity as Distinct Practices Jan-Olav Henriksen,2019-01-10 Jan Olav Henriksen reconstructs and analyzes Christianity as a cluster of practices that manifest a distinct historically and contextually shaped mode of being in the world Henriksen suggests that these practices imply a complicated relationship between the tradition in which they originate the community that emerges from and is constituted by that tradition and the individuals who appropriate the tradition that these communities mediate through their practices Thus to think of Christianity simply in terms of belief is misleading and represents an underdetermination of its distinct character Henriksen further argues this relationship needs to be described primarily as practices aimed at orientation and transformation His analysis points to Christianity s similarity to other religions in regard to the functional or pragmatic dimensions it displays Examining facets such as prayer the use of scripture preaching and doctrine Henriksen emphasizes that the element that makes a practice distinctively Christian is how it relates to and is informed by the Jesus story
