Religion in the Modern American West Ferenc Morton Szasz, 2002-01-01 When Americans migrated west they carried with them not only their hopes for better lives but their religious traditions as well Yet the importance of religion in the forging of a western identity has seldom been examined In this first historical overview of religion in the modern American West Ferenc Szasz shows the important role that organized religion played in the shaping of the region from the late nineteenth to late twentieth century He traces the major faiths over that time span analyzes the distinctive response of western religious institutions to national events and shows how western cities became homes to a variety of organized faiths that cast only faint shadows back east While many historians have minimized the importance of religion for the region Szasz maintains that it lies at the very heart of the western experience From the 1890s to the 1920s churches and synagogues created institutions such as schools and hospitals that shaped their local communities during the Great Depression the Latter day Saints introduced their innovative social welfare system and in later years Pentecostal groups carried their traditions to the Pacific coast and Southern Baptists among others set out in earnest to evangelize the Far West Beginning in the 1960s the arrival of Asian faiths the

revitalization of evangelical Protestantism the ferment of post Vatican II Catholicism the rediscovery of Native American spirituality and the emergence of New Age sects combined to make western cities such as Los Angeles and San Francisco among the most religiously pluralistic in the world Examining the careers of key figures in western religion from Rabbi William Friedman to Reverend Robert H Schuller Szasz balances specific and general trends to weave the story of religion into a wider social and cultural context Religion in the Modern American West calls attention to an often overlooked facet of regional history and broadens our understanding of the American experience

A History of Religion East and West Trevor Ling,1969-01-15 The religious traditions of Asia and Europe the East and West of the title are sometimes regarded as being in sharp contrast with each other the one mystical the other prophetic Whenever their religions are not so contrasted they are usually treated in isolation from each other the religion of Israel Zoroastrianism Judaism Christianity Hinduism Jainism and Buddhism Dr Ling however stresses that there is considerable overlap and interpenetration between the two types and areas and that it is important to see the historical inter relation between these religions and to observe how during given periods of history there are parallel developments or significant divergences He covers the period 1500 B C to the present time providing an outline of the development of Asian and European religious traditions and institutions and discussing the social and economic factors involved in the development of religious traditions although he shows that such factors alone do not account for the religious life of man Dr Ling goes on to interpret the contemporary significance of these religions and their potential for the future life of humanity He suggests that the present stage of religious advance is characterised by open endedness towards the future not all religions exhibit this character but none has yet exhausted the possibilities of development This book is intended for use as an introduction to the study of religion Although reference is made in the text to sources of further information the book can be used without reference to them
