Religious Fanaticism:

A Study of Religious Fanaticism Naomi Marguerite Goldthwaite Ekdahl, 1929 *Love Amidst Religious Fanaticism* J.J. Jatson, 2012-01-06 *Love Amidst Religious Fanaticism* is based on reality of what happened to him J.J. Jatson in real life. His wife is a Muslim while he is a Christian. They love each other and got married against their parental warning because of differences in religion. He said love is not a respecter of religion, ethnicity, tribe, or culture. Real love is not based on money nor gifts but is from the hearts. *A Study of Religious Fanaticism and Responses to it* Hal W. French, 1990 Religious Fanaticism Hannah Whitall Smith, 1928 Consisting of an account of the author of these papers and of the times in which she lived together with a description of the curious religious sects and communities of America during the early and middle years of the nineteenth century. *A Study of Religious Fanaticism and Responses to it* Hal W. French, 1990 **Christian Imaginations of the Religious Other** Marianne Moyaert, 2024-02-20 Explores how Christians created, used, and adapted religionized categories of non-Christians through the centuries. *Christian Imaginations of the Religious Other* traces the genealogy of religionization: the various ways Christians throughout history have created a sense of religious normativity while simultaneously producing various categories of non-Christian otherness. Covering a broad expanse of processes, practices, and socio-political contexts, this innovative volume analyzes the complex intersections of patterns of religionization in different eras while investigating their entanglements with racialization, sexualization, and ethnicization. With a readable and accessible style, Marianne Moyaert offers a nuanced and well-balanced critical analysis of how and why Christianity's others were named, categorized, essentialized, and governed by those exemplifying Christian normativity in Western European society. The author takes a longue dure approach: a long-term perspective on history that extends past human memory and the archaeological record, that integrates different case studies and a variety of ecclesial, theological, and literary documents. Throughout the text, Moyaert demonstrates how religionization shaped the ways Christians classified people, organized Christian societies, interacted with different Christian and non-Christian groups, and more. Surveys the relationship between shifts in Christian normativity and the way non-Christians are imagined. Helps readers connect the lasting effects of patterns of religionization with their everyday experiences. Discusses the role of Christian expansion in the differential and unequal treatment of Christianity's others. Examines legal regulations and disciplinary practices that were established to define the boundaries between Christians and non-Christians. Incorporates a wide range of scholarly resources, cutting-edge research, and the most recent insights and issues in the field. Includes textboxes with helpful summaries, illustrations, and commentary in each chapter. *Christian Imaginations of the Religious Other: A History of Religionization* is an excellent textbook for undergraduate and graduate courses in interreligious studies, comparative theology, theological approaches to religious diversity, Christian-Jewish-Muslim relations, race and religion, and theorizing religion. Professor Moyaert is one of the world's best scholars of comparative theology. In this magisterial new work, she helps scholars of religion to better learn how

religious images whether drawn with pictures or words are crucial to how we understand ourselves and each other Amir Hussain President American Academy of Religion Breathtaking in scope and detail Moyaert offers an original history of the ways Christians have projected distorted images of their religious others with devastating material consequences Her illuminating story of the past is a searchlight for our present Jeannine Hill Fletcher Professor of Theology Fordham University Christian Imaginations is a superb study of the role that Western political programs play in the historical construction of identity boundaries Analytically erudite and socially committed Moyaert's book powerfully interrogates what counts as religion making this text a must read for anyone interested in interreligious studies Santiago Slabodsky Florence and Robert Kaufman Professor in Jewish Studies Hofstra University Raising the historical formation of religious identities to the level of contemporary treatments of gender and racialization Christian Imaginations of the Religious Other is essential reading for students of religion Michelle Voss Professor of Theology and Past Principal Emmanuel College of Victoria University in the University of Toronto Crafting a Western European mosaic of religionization's turbulent history Moyaert unveils how religious identities are constructed hierarchies function and their relevance for engaging diverse societies today worldwide Hans Gustafson Adjunct Professor of Theology University of St Thomas *Dictionary of Doctrinal and Historical Theology* John Henry Blunt, 1870 The Scheduled Castes in India Anirban Kashyap, 1996 Attempts have been made in this study to present an over all profile of the Scheduled Castes from different dimensions i.e. facts figures and their interpretations the policy of segregation of a sizable section of Indian population on the basis of caste **Traditional Authority, Islam, and Rebellion** Karl D. Jackson, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980 **The Philosophy of Fanaticism** Leo Townsend, Ruth Rebecca Tietjen, Hans Bernhard Schmid, Michael Staudigl, 2022-07-26 The essays in this volume explore some of the disconcerting realities of fanaticism by analyzing its unique dynamics and considering how it can be productively confronted The book features both analytic and continental philosophical approaches to fanaticism Working at the intersections of epistemology philosophy of emotions political philosophy and philosophy of religion the contributors address a range of questions related to this increasingly relevant yet widely neglected topic What are the distinctive features of fanaticism What are its causes motivations and reasons In what ways if at all is fanaticism epistemically ethically and politically problematic And how can fanaticism be combatted or curtailed The Philosophy of Fanaticism will be of interest to scholars and advanced students working in epistemology philosophy of religion philosophy of emotions moral psychology and political philosophy *The Two Faces of Religion* N. S. Xavier, 2025-08-28 The Two Faces of Religion considers the entire spectrum of religious experience under the twin aspects of its opposite poles the radiance of mature spirituality and the

gloom of sick religiosity Although Dr Xavier necessarily contrasts the positive heights and the negative depths of mankind's spiritual experience he equally emphasizes the vast grey areas of overlap It is in these areas of overlap that Dr Xavier's medical and psychiatric expertise accomplishes the most fruitful of outcomes the recovery of troubled soul from the psycho-religious tensions and afflictions so common in today's turbulent and pressurized society His exploration of the dynamic factors underlying the religious spectrum love courage wisdom hate fear egoism identity etc provides a wealth of information and insight to those who are seeking psychological and spiritual growth Clinical historic and literary examples illustrating the operation of these dynamic factors make the book particularly interesting to professionals and lay people alike

Max Stirner and the Political Theology of Fanaticism Jorn Janssen, 2024-08-07 This book provides a rigorous and insightful exploration of political fanaticism guided by a nuanced interpretation of the works of Max Stirner a philosopher often overlooked in contemporary discourse Based on a comprehensive analysis of Stirner's perspectives the book sheds light on the phenomenon of political fanaticism and its implications for modern society Defined as an intense and irrational emotional investment in political convictions political fanaticism permeates both North American and European contexts presenting a significant area of study within political theory The aim of this work is not to advocate for any particular ideological position but rather to critically examine the phenomenon itself Central to the investigation is Stirner's distinctive idea that political fanaticism mirrors the fervor of religious zealotry transposed onto the political stage By delving into Stirner's philosophical insights the book aims to elucidate the underlying mechanisms driving political fanaticism and its relationship to broader societal shifts Contributing to the field of political theology by exploring the intersections between politics and religious belief systems the aim is to achieve a deeper understanding of the complex dynamics at play in contemporary political discourse Ultimately the goal is to provide scholars and researchers with a comprehensive framework for analyzing and contextualizing political fanaticism within the broader landscape of modern politics By engaging with Stirner's works and interrogating their relevance to contemporary challenges the book seeks to enrich scholarly discourse and foster critical reflection on this pressing issue

Modes of Religiosity Harvey Whitehouse, 2004-05-19 Religions_ whatever else they may be _are configurations of cultural information reproduced across space and time Beginning with this seemingly obvious fact of religious transmission Harvey Whitehouse goes on to construct a testable theory of how religions are created passed on and changed At the center of his theory are two divergent modes of religiosity the imagistic and the doctrinal Drawing from recent advances in cognitive science Whitehouse's theory shows how religions tend to coalesce around one of these two poles depending on how religious behaviors are remembered In the imagistic mode rituals have a lasting impact on people's minds haunting not only our memories but influencing the way we ruminate on religious topics These psychological features are linked to the scale and structure of religious communities fostering small exclusive and ideologically heterogeneous ritual groupings or factions In the doctrinal mode on the other hand religious knowledge is primarily spread through intensive and

repetitive teaching religious communities are contrastingly large inclusive and centrally regulated While these tendencies have long been recognized in the history of the study of religion the modes of religiosity theory is unique in that it explains why these tendencies exist More importantly Whitehouse does not give the final word but invites us to join a series of collaborative networks among anthropologists historians archaeologists and psychologists currently trying to falsify confirm or refine the theory Are you tired of the flood of descriptions and interpretations of religions which offer no clear strategy for evaluation comparison and testing Modes of Religiosity can provide you with a new way to think when you think about religion

Terror and Transformation James W. Jones, 2014-02-04 Religion has been responsible for both horrific acts against humanity and some of humanity s most sublime teachings and experiences How is this possible From a contemporary psychoanalytic perspective this book seeks to answer that question in terms of the psychological dynamic of idealisation At the heart of living religion is the idealisation of everyday objects Such idealisations provide much of the transforming power of religious experience which is one of the positive contributions of religion to the psychological life However idealisation can also lead to religious fanaticism which can be very destructive Drawing on the work of various contemporary relational

theorists within psychoanalysis this book develops a psychoanalytically informed theory of the transforming and terror producing effects of religious experience It discusses the question of whether or not if idealisation is the cause of many of the destructive acts done in the name of religion there can be vital religion without idealisation This is the first book to address the nature of religion and its capacity to sponsor both terrorism and transformation in terms of contemporary relational psychoanalytic theory It will be invaluable to students and practitioners of psychoanalysis psychotherapy psychology and religious studies and to others interested in the role of religion in the lives of individuals and societies

Evolutionary Processes in the Natural History of Religion Hansjörg Hemminger, 2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field
