Carroll, Paul Brockelman, 2016-10-04 The recent release of Pope Francis's much discussed encyclical on the environment *Laudato Si' On Care for Our Common Home* has reinforced environmental issues as also moral and spiritual issues. This anthology, twenty years ahead of the encyclical but very much in line with its agenda, offers essays by fifteen philosophers, theologians, and environmentalists who argue for a response to ecology that recognizes the tools of science but includes a more spiritual approach, one with a more humanistic, holistic view based on inherent reverence toward the natural world. Writers whose orientations range from Buddhism to evangelical Christianity to Catholicism to Native American beliefs explore ways to achieve this paradigm shift and suggest that the environment is not only a spiritual issue but the spiritual issue of our time.      **A Greener Faith** Roger S. Gottlieb, 2006-06-15 In a time of darkening environmental prospects, frightening religious fundamentalism, and moribund liberalism, the remarkable and historically unprecedented rise of religious environmentalism is a profound source of hope. In *A Greener Faith*, Roger S. Gottlieb chronicles the promises of this critically important movement, illuminating its principal ideas, leading personalities, and ways of connecting care for the earth with justice for human beings. He also shows how religious environmentalism breaks the customary boundaries of religious issues in political life. Asserting that environmental degradation is sacrilegious, sinful, and an offense against God, catapults religions directly into questions of social policy, economic and moral priorities, and the overall direction of secular society. Gottlieb contends that a spiritual perspective applied to the Earth provides the environmental movement with a uniquely appropriate way to voice its dream of a sustainable and just world. Equally important, it helps develop a world-making political agenda that far exceeds interest group politics applied to forests and toxic incinerators. Rather, religious environmentalism offers an all-inclusive vision of what human beings are and how we should treat each other and the rest of life. Gottlieb deftly analyzes the growing synthesis of the movement's religious, social, and political aspects as well as the challenges it faces in consumerism, fundamentalism, and globalization. Highly engaging and passionately argued, this book is an indispensable resource for people of faith, environmentalists, scholars, and anyone who is concerned about our planet's future.      **Pollution and the Death of Man** Francis August Schaeffer, 1970 This book addresses the environmental problem which presses in upon all of us. As in other problem areas confronting mankind, the author points out biblical Christian guidelines which, if followed, would bring about substantial healing and restoration.      **The Earth in God's Economy** E. M. Conradie, 2015 Ecological destruction is taking

place on such a scale that it prompts the need to make sense of the world in which we live and of this moment in history This study explores the ecological significance of seeing the world as the whole household of the triune God and more specifically in terms of God's acts of house holding economy including creation salvation and eschatological consummation Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 10 Subject Religious Studies Environmental Studies Ecology **Nature and the Environment in Contemporary Religious Contexts** Thomas
