## **Religious Faith Spirituality And Health Communication:**

**Religious Faith, Spirituality, and Health Communication** Roxanne Parrott, 2004-01-01 A primary premise of this special issue is that religious faith and spirituality comprise an integral component of lay discourse and lay theories associated with health. The articles included in this collection begin to fill a void and at the same time illustrate a role health communication fulfills within the behavioral sciences emphasizing how everyday people make sense of health conditions in their daily living. Following the introduction the next paper provides an integrated synthesis of the ways and means that religious faith and spirituality have been assessed primarily through use of quantitative measures. The next two articles utilize instruments discussed in the previous review. The remaining papers utilize qualitative methods to begin to address the absence of specific understanding regarding religious faith and health communication, answering the challenge to health communicators to enrich the field through greater use of such methodological approaches to inquiry. **Health**

**Communication for Social Justice** Vinita Agarwal, 2023-10-24 This textbook combines whole person and social justice perspectives to educate students on the role of communication in promoting inclusive and person-centered healthcare practices. This book explores health inequities experienced by disadvantaged and marginalized populations and outlines the actions students can take to address these challenges. The book demonstrates how physical, mental, and emotional health is connected to equitable understandings of individual, community, and environmental health. It considers how social, interpersonal, and systemic factors such as personal relationships, language, literacy, religion, technology, and the environment affect health equity. To present strategies and invite action to support the goals of the whole person social justice activist approach, the book provides contemporary examples, interviews with communication scholars, and case studies that examine local communities and the everyday contexts of health meaning-making. This textbook serves as a core or supplemental text for graduate and upper-level undergraduate courses in health communication. Online resources include PowerPoint slides and an instructor manual containing sample syllabi, assignments, and test questions. They are available online at [www.routledge.com/9781032081038](http://www.routledge.com/9781032081038). **Narratives, Health, and Healing** Lynn M. Harter, Phyllis M. Japp, Christina S. Beck, 2006-04-21 This volume explores how narratives are used in the social construction of wellness and illness. It is intended for scholars and advanced students in health communication and applied health disciplines. **Communicating to Manage**

**Health and Illness** Dale E. Brashers, Daena Goldsmith, 2009-08-11 This edited volume advances the theoretical bases of health communication in two key areas: communication identity and relationships and health care provider-patient interaction. Chapters aim to underscore the theory that communication processes are a link between personal, social, cultural, and institutional factors and various facets of health and illness. *Integrating Spirituality in Health and Social Care* Wendy Greenstreet, 2006 This practical guide considers spiritual care as an explicit component of health and social care and takes into account not only religious, cultural, and spiritual views but also the value of music, art, and other creative therapies.
