Religious Fundamentalism And American Education:

Religious Fundamentalism and American Education Eugene F. Provenzo, 1990 *Religious Fundamentalism and American Education* Eugene F. Provenzo Jr., 1990-04-05 For the past twenty five years ultra fundamentalist Christians have put increasing pressure on American public education to conform exclusively with their own philosophy and vision of education and culture Eugene Provenzo considers and addresses the impact that the fundamentalist movement has had on such issues as censorship textbook content Creationism versus Evolution the family and education school prayer and the state regulation of Christian schools In exploring both sides of the debate however the author concludes that many fundamentalists concerns are justified due to a basic inconsistency between the rights guaranteed under the First Amendment and the position that many public schools have legally assumed

The Tragedy of American School Reform Ronald W. Evans, 2011-05-09 Two persistent dilemmas haunt school reform curriculum politics and classroom constancy Both undermined the 1960s new social studies a dynamic reform movement centered on inquiry issues and social activism Dramatic academic freedom controversies ended reform and led to a conservative restoration On one side were teachers and curriculum developers on the other conservative activists determined to undo the revolutions of the 1960s The episode brought a return to traditional history a turn away from questioning and the re imposition of authority Engagingly written and thoroughly researched The Tragedy of American School Reform offers a provocative perspective on current trends

Religion in Multicultural Education Farideh Salili, Rumjahn Hoosain, 2006-05-01 The National Association for Multicultural Education in Washington D C listed a number of issues that the school curriculum should address with reference to multicultural education including racism sexism classism linguisticism ablism ageism heterosexism and religious intolerance It is noteworthy that of all these issues religion is about the only one that throughout history people are willing to die for although whether what is at issue is really religion or other things such as territory is another matter It is also interesting that all the others have isms in their names but religious issues are characterized by intolerance Perhaps we should try to understand this intolerance and look at what steps might

help to alleviate it. However, while intolerance might seem a simple thing, understanding what is behind it and how it plays such a crucial role in religion requires what we refer to in the Introduction chapter as a multifaceted approach at multiple levels. It is not enough just to try to dispel stereotypes of followers of other religions or to point out commonalities in world religions. We should, for example, try to understand and appreciate how adherents of other religions try to answer questions regarding their adaptation to the contemporary environment. It is through understanding how different religions coexist side by side at various levels that we truly come to learn about religion in multicultural education.

Handbook of Religion and Society David Yamane, 2016-07-15. The Handbook of Religion and Society is the most comprehensive and up to date treatment of a vital force in the world today. It is an indispensable resource for scholars, students, policy makers and other professionals seeking to understand the role of religion in society. This includes both the social forces that shape religion and the social consequences of religion. This handbook captures the breadth and depth of contemporary work in the field and shows readers important future directions for scholarship. Among the emerging topics covered in the handbook are biological functioning, organizational innovation, digital religion, spirituality, atheism and transnationalism. The relationship of religion to other significant social institutions like work and entrepreneurship, science and sport is also analyzed. Specific attention is paid where appropriate to international issues as well as to race, class, sexuality and gender differences. This handbook includes 27 chapters by a distinguished, diverse and international collection of experts organized into 6 major sections: religion and social institutions, religious organization, family life, course and individual change, difference and inequality, political and legal processes and globalization and transnationalism.

Race and Educational Reform in the American Metropolis Dan A. Lewis, Kathryn Nakagawa, 1994-12-23

Religious Education in a Pluralist Society John Edwards, Peter R. Hobson, 2019-07-12. Religious education in liberal pluralist societies such as the UK, the USA and Australia underwent radical change in the 1980s and 1990s with a major shift towards multi-faith educationally oriented programmes. This has meant significant modifications to both the content and the methodology of religious education courses and to the way they are conceived of and taught in schools and universities. One important implication of this change for the teaching and study of religion today is the need for a philosophical dimension that deals with issues such as the truth status of religious statements and the moral acceptability of religious claims. This dimension is often insufficiently developed; this lack is made more critical by the multiple competing truth claims of various religions giving rise to such contentious problems as the growth of fundamentalism, increasing religious intolerance and conflict and differences of opinion on central moral problems such as birth control, abortion and euthanasia. This text attempts to provide the philosophical underpinning that the study and teaching of religion in modern societies requires.

The Racial Crisis in American Higher Education William A. Smith, Philip G. Altbach, Kofi Lomotey, 2012-02-01 Why is it that as we enter the twenty first century the nation's predominantly white colleges and universities continue to be settings where people of color feel unwelcome and marginalized The contributors to this volume dissect a variety of structural and attitudinal factors that are prevalent in the higher education community organizational constructs and value orientations which seem to hark more to the past than to the future They comment on the political social and economic factors that have shaped academic culture and buttressed its quietly efficient maintenance of racially discriminatory practices The American system of higher education is often regarded as the best in the world Smith Altbach and Lomotey have edited a volume that implicitly asks how much better still it could be if it embraced people of color and provided them with a supportive and nurturing environment one which encouraged them to reach their fullest creative and intellectual potential Indeed this will probably be the most significant challenge that the academy faces in the twenty first century William B Harvey Vice President and Director Office of Minorities in Higher Education American Council on Education Washington D C

autonomy these schools have retained a consistent belief system and mission over several decades Private religious schools can be traced to our nation s earliest origins Why is it that these unique educational institutions arose in twentieth century America and have continued to thrive A Christian America Restored seeks to delve into the beginnings of private Christian schools and discovers that while they are relatively new on the educational landscape of America their roots are actually quite deep connecting with the ongoing dreams of our nation s conservative evangelicals Between Church and State James W.
