Religious Advocacy and American History Bruce Kuklick, Darryl G. Hart, 1997 Religious Advocacy and American History explores the general question of bias and objectivity in higher learning from the perspective of the role of religious convictions in the study of American history

**Science and Religion in the Twnty-First Century** Russell ReManning, 2013-02-06 stellar cast of leading theologians and scientists debating science and religion in the public arena The

Boyle lectures are a prestigious lecture series held annually in the City of London Engaging themes at the cutting edge of contemporary science and religion debates from evolution and emergence to the psychology of religious beliefs      **On the Origin of Consciousness** Scott D. G. Ventureyra,2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration      **The Rationality of Theism** Paul Copan,Paul Moser,2004-07-31 The Rationality of Theism is a controversial collection of brand new papers by thirteen outstanding philosophers and scholars Its aim is to offer comprehensive theistic replies to the traditional arguments against the existence of God offering a positive case for theism as well as rebuttals of recent influential criticisms of theism      The Cambridge History of Reformation Era Theology Kenneth G Appold,Nelson Minnich,2023-10-12 The Cambridge History of Reformation Era Theology explores the key developments in both Protestant and Catholic theology ca 1475 1650 Exploring the various settings and schools in which theology was formulated and taught and the social backgrounds of its exponents including women and non university trained men as well as writers both in and outside Europe it establishes how the major denominations took their positions and participated in a broader discourse The volume examines specific theological themes from different denominational perspectives demonstrating how theology affected the lives of believers via pastoral theology canon law and spirituality and how theological ideas were linked to politics warfare science and the arts Written by an international team of leading scholars in the field this History expands the range of theological discourse by introducing new topics and spokespersons as well as global and ecumenical perspectives It will remain the definitive place to begin any further study of theology during this period for years to come      **Religion and Science** W. Mark Richardson,Wesley J. Wildman,2012-10-12 Emphasizing its historical methodological and constructive dimensions Religion and Science takes the pulse of pertinent current research as the interdisciplinary study of science and religion gains momentum      **The Foundations of Modern Science in the Middle Ages** Edward Grant,1996-10-28 This 1997 book views the substantive achievements of the Middle Ages as they relate to early modern science      The Great Turning Point Terry Mortenson,2004 Many people in the Church today have the

idea that young earth creationism is a fairly recent invention popularized by fundamentalist Christians in the mid 20th century Is this view correct In fact scholar Terry Mortenson has done fascinating original research on this subject in England and documents that several leading pre Darwin scholars and scientists known as scriptural geologists did not believe in long ages for the earth This book is a thoroughly researched work of reference for every library certainly every creationist library Terry Mortenson spent much time and work on this project in both the United States and Great Britain The history of the Church and evolution is fascinating and it is interesting to see not only the tremendous influence that evolution has had on the Church but on society as well

**The Religion of Technology** David F. Noble, 2013-01-23 Arguing against the widely held belief that technology and religion are at war with each other David F Noble s groundbreaking book reveals the religious roots and spirit of Western technology It links the technological enthusiasms of the present day with the ancient and enduring Christian expectation of recovering humankind s lost divinity Covering a period of a thousand years Noble traces the evolution of the Western idea of technological development from the ninth century when the useful arts became connected to the concept of redemption up to the twentieth when humans began to exercise God like knowledge and powers Noble describes how technological advance accelerated at the very point when it was invested with spiritual significance By examining the imaginings of monks explorers magi scientists Freemasons and engineers this historical account brings to light an other worldly inspiration behind the apparently worldly endeavors by which we habitually define Western civilization Thus we see that Isaac Newton devoted his lifetime to the interpretation of prophecy Joseph Priestley was the discoverer of oxygen and a founder of Unitarianism Freemasons were early advocates of industrialization and the fathers of the engineering profession Wernher von Braun saw spaceflight as a millenarian new beginning for humankind The narrative moves into our own time through the technological enterprises of the last half of the twentieth century nuclear weapons manned space exploration Artificial Intelligence and genetic engineering Here the book suggests that the convergence of technology and religion has outlived its usefulness that though it once contributed to human well being it has now become a threat to our survival Viewed at the dawn of the new millennium the technological means upon which we have come to rely for the preservation and enlargement of our lives betray an increasing impatience with life and a disdainful disregard for mortal needs David F Noble thus contends that we must collectively strive to disabuse ourselves of the inherited religion of technology and begin rigorously to re examine our enchantment with unregulated technological advance

*Faith Encounters of the Third Kind* David J. Brewer, 2021-09-21 Interreligious dialogue that strives for both hospitality and honest discussion of difference Is it possible to have both Is it possible for religious traditions to engage one another in a spirit of humility while also working together toward mutual descriptions of God and the world This is the goal of this book to find points at which each of the religious traditions are vulnerable and open enough to listen to each other and to help each other toward a shared description of reality If you share these concerns concerns for interfaith dialogue as well as for deeply held

notions of conviction and truth then the invitation is open for mutual constructive engagement     The Cambridge Companion to Christian Ethics Robin Gill, 2001 Provides a comprehensive introduction to Christian ethics which is both authoritative and up to date
