Utopias and Architecture Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

New SubUrbanisms Judith K De Jong,2013-09-11 Historically we see the city as the cramped crumbling core of development and culture and the suburb as the vast outlying wasteland convenient but vacant Contemporary urban design proves this wrong In New SubUrbanisms Judith De Jong explains the on going flattening of the American Metropolis as suburbs are becoming more like their central cities and cities more like their suburbs through significant changes in spatial and formal practice as well as demographic and cultural changes These revisionist practices are exemplified in the emergence of hybrid sub urban conditions such as parking practices the residential densification of suburbia hyper programmed public spaces and inner city big box retail among others Each of

these hybridized conditions reflects to varying degrees the reciprocating influences of the urban and the suburban Each also offers opportunities for innovation in new formal and spatial practices that re configure conventional understandings of urban and suburban and in new ways of forming the evolving American metropolis Based on this new understanding De Jong argues for the development of new ways of building the city Aimed at students and practitioners of urban design and planning New SubUrbanisms attempts to re frame the contemporary metropolis in a way that will generate more instrumental engagement and ultimately better design

Architecture as Cultural and Political Discourse Daniel Grincer, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Königsplatz Auschwitz concentration camp and the Prora resort Sydney's suburban race riots and the Australian Immigration Detention Centre on Christmas Island
