Remaking The Concept Of Aptitude Extending The Legacy Of Richard E Snow:

Remaking the Concept of Aptitude Lyn Corno, Lee J. Cronbach, Haggai Kupermintz, David F. Lohman, Ellen B. Mandinach, Ann W. Porteus, Joan E. Talbert, 2001-09 Richard E Snow's final book unfinished at his death in 1997 has been organized completed by a panel of his colleagues The book identifies questions that research should address to combine aptitude theory with theory of social cognitive processes

Remaking the Concept of Aptitude Richard E. Snow, Lyn Corno, Lee Joseph Cronbach, 2002 A panel of experts and former associates completed this book after Richard E Snow's death in 1997 expanding his notes on implications of the theory for instructional design and teaching practice The panel developed Snow's ideas on where the field should go next emphasizing his promising research strategies Viewing intelligence as education's most important product and its most important raw material Snow stressed the need to consider both cognitive skills and affective motivational characteristics In this volume previously unconnected research and various theoretical ideas are integrated into a dynamic model of aptitude Understanding the transaction between person and situation was Snow's primary concern This work draws from diverse resources to construct a theoretical model of aptitude as a complex process of unfolding person situation dynamics

Advances in Computerized Scoring of Complex Item Formats Brian E. Clauser, 2014-07-16 This special issue was motivated by the move from research to operations for computerized delivery and scoring of complex constructed response items The four papers presented provide an overview of the state of the art for such applications The issue begins by describing the range of computer delivered formats and computerized scoring systems that are currently in use The remaining papers provide three views of validity in the context of computer delivered and scoring assessments It is hoped that together these articles will provide the reader with both an appreciation of the state of the art for computer automated scoring systems as well as a perspective on the issues that must be considered and the evidence that must be collected to produce automated scoring systems that allow for valid inference

Transactional Psychology of Education Wolff-Michael Roth, 2019-01-22 Toward the end of his life the Russian psychologist L S Vygotsky turned away from his earlier work that he has become famous for only to sow the seeds for a new theory In this theory affect was to play a central role there was to be a primacy of social relations and anything mental mind thought self other knowledge was an event rather than a thing This is essentially a transactional perspective In this book the author articulates a transactional psychology of education drawing on the works of G H Mead J Dewey G Bateson F Mikhailov and E Il'enkov All theoretical positions are developed out of videotaped exchanges thereby giving concrete character to every psychological concept articulated
