A Different Approach to Cosmology F. Hoyle,G. Burbidge,J. V. Narlikar,2000-02-17 This is a different kind of book about cosmology a field of major interest to professional astronomers physicists and the general public All research in cosmology adopts one model of the universe the hot big bang model But Fred Hoyle Geoffrey Burbidge and Jayant Narlikar take a different approach Starting with the beginnings of modern cosmology they then conduct a wide ranging and deep review of the observations made from 1945 to the present day Here they challenge many conventional interpretations The latter part of the book presents the authors own account of the present status of observations and how they should be explained The controversial theme is that the dependency on the hot big bang model has led to an unwarranted rejection of alternative cosmological models Writing from the heart with passion and punch these three cosmologists make a powerful case for viewing the universe in a different light
