**Remembering the University of Chicago** Edward Shils, 1991-12 To celebrate the intellectual achievement of the University of Chicago on the occasion of its centennial year Edward Shils invited a group of notable scholars and scientists to reflect upon some of their own teachers and colleagues at the University *Dead Men's Propaganda* Terhi Rantanen, 2024-05-07 In *Dead Men's Propaganda* Ideology and Utopia in Comparative Communications Studies Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to understanding the 21st century's challenges of war and rival streams of propaganda Borrowing her conceptual lenses from Karl Mannheim and Robert Merton Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy illuminating the work of pioneers in the field Some of these were well known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press* Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migrant scholars notably Paul Kecskemeti and Nathan Leites Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century this book challenges orthodoxies in the intellectual histories of communication studies *Richard Rorty* Neil Gross, Professor of Sociology Neil Gross, 2010-10 On his death in 2007 Richard Rorty was heralded by the New York Times as one of the world's most influential contemporary thinkers Controversial on the left and the right for his critiques of objectivity and political radicalism Rorty experienced a renown denied to all but a handful of living philosophers In this masterly biography Neil *The Common Law Tradition* George Liebmann, 2017-09-04 This book commemorates a place and a time in American law teaching but more importantly an outlook the common law tradition That outlook was empirical and tolerant These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct Now in paperback *The Common Law Tradition* is a collective portrait of five scholars who epitomize the tradition The focus is Chicago in the 1960s The five figures considered Edward H Levi Harry Kalven Jr Karl Llewellyn Philip Kurland and Kenneth Culp Davis did much to broaden the perspectives of the legal academy Levi made use of sociology economics and comparative law Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans Llewellyn's commitment to empirical research underpinned his work on the Uniform Commercial Code Kurland's approach to constitutional law was highlighted by his insistence on the relevance of legal history Davis was an energetic comparativist in his work on administrative law What distinguished these

Chicagoans is that their work was practical and rooted in the law and hence yielded concrete applications The group s diversity the tolerant atmosphere in which they taught and wrote and the attachment of its individual members to empirical approaches differentiate them from today s legal scholars and make their ideas of continuing importance Milton Friedman Lanny Ebenstein,2024-09-04 The first biography of one of the twentieth century s greatest economic thinkers Milton Friedman Born the son of immigrant parents Milton Friedman went on to become a major figure during the resurgence of American conservatism As an advisor to the Reagan administration and a widely read columnist he played a vital role in shaping government policy and public opinion while he made headlines for his controversial views Drawing on author Lanny Ebenstein s unprecedented access to personal archives and to Friedman himself this is the first book to trace his life and development as an economic theorist With a combination of intimate personal detail and fascinating exploration of economic theory Milton Friedman A Biography provides a revealing look at the man regarded by many as a hero of libertarianism and laissez faire economics **Basic Theories of Intellectual Property Transaction** Ming

Yang,2025-07-12 From the perspective of the market this book discusses the basic theories and operation mechanism of intellectual property transactions based on the behavior choice theory aiming to deeply understand how the specific systems and rules of intellectual property are operated or applied beyond the external form of system application China s long standing intellectual property legal doctrines and the corresponding knowledge system whether legislative judicial or theoretical research deserve reflection in three aspects i the neglect of market principles ii the lack of behaviorism research perspectives and methods and iii the lack of systematic degree of existing research This book is an introspection on the basic theoretical research of intellectual property in China from the above three aspects This book closely focuses on the coupling relationship between system implementation and behavior choice along with the logical context of intellectual property transactions the institutional mechanism behind the specific transaction forms is investigated and its benefits are analyzed And the essence of the economic mechanism of the intellectual property system is deeply interpreted from both theoretical and practical aspects The target audience is intellectual property law researcher and the content level is the theoretical foundation research Starting from the principles of the entitlement of intellectual property this book tries to reveal the institutional implication of the creation of right the boundary of right and the attribute of right And this book also tries to sort out the matching attribute between the existing intellectual property systems and the operation of the intellectual property market Finally by analyzing the correlation between the market environment and the subject s behavior choice this book tries to clarify the internal logic between system market and behavior These aforesaid features will help IP researchers deeply understand how existing legal systems and rules affect specific intellectual property transactions *Between Athens and Jerusalem* David Janssens,2009-01-08 Examines the early works of German Jewish philosopher Leo Strauss 1899 1973

**The Light That Binds** Rev. Stephen L. Brock,2020-03-30 If there is any one author in the history of moral thought who

has come to be associated with the idea of natural law it is Saint Thomas Aquinas Many things have been written about Aquinas s natural law teaching and from many different perspectives The aim of this book is to help see it from his own perspective That is why the focus is metaphysical Aquinas s whole moral doctrine is laden with metaphysics and his natural law teaching especially so because it is all about first principles The book centers on how Aquinas thinks the first principles of practical reason which for him are what make up natural law function as laws It is a controversial question and the book engages a variety of readers of Aquinas including Francisco Suarez Jacques Maritain prominent analytical philosophers Straussians and the initiators of the New Natural Law theory Among the issues addressed are the relation between natural law and natural inclination how far natural law depends on knowledge of human nature what its obligatory force consists in and above all how it is related to what for Aquinas is the first principle of all being the divine will
