of Human Experience Glenn Petersen, 2021-05-20 Glenn Petersen flew seventy combat missions in Vietnam when he was nineteen launching from an aircraft carrier in the Tonkin Gulf. He'd sought out the weighty responsibilities and hazardous work. But why? What did the cultural architecture of the society he grew up in have to do with the way he went to war? In this book he looks at the war from an anthropological perspective because that's how he's made his living in all the subsequent years. It's how he sees the world. While anthropologists write about the military and war these days they do so from the perspective of researchers. What makes this a fully original contribution is that Petersen brings to the page the classic methodology of ethnographers: participant observation, a kind of total immersion. He writes from the dual perspectives of an insider and a researcher and seeks in the specifics of lived experience some larger conclusions about humans' social lives in general. Petersen was long oblivious to what had happened to him in Vietnam and he fears that young men and women who've been fighting the US military's wars in Afghanistan and Iraq might be similarly unaware of what's happened to them. Skills that allowed him to survive in combat, in particular his ability to focus tightly on the challenges directly in front of him, seemed to transfer well to life after war. The same intensity led him to a successful academic career, including the time he represented the Micronesian islands at the United Nations. How could anything be wrong? Then surreptitiously the danger, the stress, and the trauma he'd hidden away broke through a brittle shell and the war came spilling out. As an anthropologist he sees in this a classic pattern: an adaptation to one set of conditions is put to a new and practical use when conditions change, but in time what had once been beneficial turns into maladaptive behavior. In writing about why we fight, he sheds light on what the fighting does to us.

Toys and American Culture Sharon M. Scott, 2009-12-09 Tracing developments in toy making and marketing across the evolving landscape of the 20th century, this encyclopedia is a comprehensive reference guide to America's most popular playthings and the culture to which they belong. From the origins of favorite playthings to their associations with events and activities, the study of a nation's toys reveals the hopes, goals, values, and priorities of its people. Toys have influenced the science, art, and religion of the United States and have contributed to the development of business, politics, and medicine. *Toys and American Culture: An Encyclopedia* documents America's shifting cultural values as they are embedded within and transmitted by the nation's favorite playthings. Alphabetically arranged entries trace developments in toy making and toy marketing across the evolving landscape of 20th century America. In addition to discussing the history of America's most influential toys, the book contains specific entries on the individuals, organizations, companies, and publications that gave shape to America's culture of play from 1900 to 2000. Toys from the two decades that frame the 20th century are also included as bridges to the fascinating past and the inspiring future of American toys.

The Atomic Bomb and American Society Rosemary B. Mariner, G. Kurt Piehler, 2009 Drawing on the latest research on the atomic bomb and its history, the contributors to this provocative collection of eighteen essays set out to answer two key questions: First, how did the atomic bomb, a product of unprecedented technological innovation, rapid industrial scale manufacturing, and unparalleled military

deployment shape U S foreign policy the communities of workers who produced it and society as a whole And second how has American society s perception that the the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media scientists public intellectuals and even the entertainment industry In answering these questions The Atomic Bomb and American Society sheds light on the collaboration of science and the military in creating the bomb the role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of Remembering War the American Way and World War II in the American Soldiers Lives Series as well as the coeditor with John Whiteclay Chambers II of Major Problems in American Military History

Continental Defense in the Eisenhower Era C. Bright, 2010-09-27 Thousands of nuclear antiaircraft arms were designed tested and deployed in the United States during Dwight D Eisenhower s presidency These Army Nike Hercules missiles Air Force Genie rockets and BOMARC and Falcon missiles were meant to counter a raid by attacking Soviet bombers U S policy makers believed that the American weapons could safely compensate for technological limitations which otherwise

made it difficult to destroy high flying fast moving airplanes Continental Defense in the Eisenhower Era traces this armament from conception through deployment Bright recounts official actions doctrinal decisions and public policies It also discusses the widespread acceptance of these weapons by the American public a result of being touted in news releases featured in films and television episodes and disseminated throughout society as a whole
