Other Words Jace Weaver, 2001

Eloh a Cherokee word is usually translated by anthropologists as religion but it also simultaneously encompasses history culture knowledge law and land In this provocative work Jace Weaver interlaces these seemingly disparate meanings to form a coherent approach to Native American Studies In nineteen interrelated chapters Weaver presents a range of experiences shared by native peoples in the Americas from the distant past to the uncertain future He examines Indian creative output from oral tradition to the postmodern wordplay of Gerald Vizenor and brings to light previously overlooked texts Weaver also tackles up to the minute issues including environmental crises Native American spirituality repatriation of Indian remains and cultural artifacts and international human rights

Deep Waters Christopher B. Teuton, 2018-11-01 Weaving connections between indigenous modes of oral storytelling visual depiction and contemporary American Indian literature Deep Waters demonstrates the continuing relationship between traditional and contemporary Native American systems of creative representation and signification Christopher B Teuton begins with a study of Mesoamerican writings Din sand paintings and Haudenosaunee wampum belts He proposes a theory of how and why indigenous oral and graphic means of

recording thought are interdependent their functions and purposes determined by social political and cultural contexts The center of this book examines four key works of contemporary American Indian literature by N Scott Momaday Gerald Vizenor Ray A Young Bear and Robert J Conley Through a textually grounded exploration of what Teuton calls the oral impulse the graphic impulse and the critical impulse we see how and why various types of contemporary Native literary production are interrelated and draw from long standing indigenous methods of creative representation Teuton breaks down the disabling binary of orality and literacy offering readers a cogent historically informed theory of indigenous textuality that allows for deeper readings of Native American cultural and literary expression **Postindian Aesthetics** Debra K. U. Reimold, Roger Lawrence Gibson, 2006-01-01 This Special Paper presents a collection of 19 papers contributed to a joint Field Forum organized by the Geological Society of America and the Geological Society of South Africa in July 2004 in the Barberton Greenstone Belt and the Vredefort Dome South Africa The papers cover a wide variety of themes including Archean and Proterozoic crust formation and geodynamics with an appraisal of evidence of Archean subduction processes the significance of impacts in the evolution of the early Earth's crust traces of early life in Archean environments of Australia and South Africa and related studies of depositional environments and processes affecting the giant Witwatersrand gold deposit Publisher's website New Indians, Old Wars Elizabeth Cook-Lynn, 2023-12-11 Challenging received American

history and forging a new path for Native American studies Addressing Native American Studies past present and future the essays in New Indians Old Wars tackle the discipline head on presenting a radical revision of the popular view of the American West in the process Instead of luxuriating in its past glories or accepting the widespread historians view of the West as a shared place Elizabeth Cook Lynn argues that it should be fundamentally understood as stolen Firmly grounded in the reality of a painful past Cook Lynn understands the story of the American West as teaching the political language of land theft and tyranny She argues that to remedy this situation Native American studies must be considered and pursued as its own discipline rather than as a subset of history or anthropology She makes an impassioned claim that such a shift not merely an institutional or theoretical change could allow Native American studies to play an important role in defending the sovereignty of indigenous nations today Early Earth Systems Hugh R. Rollinson, 2009-03-12 Early Earth Systems provides a complete history of the Earth from its beginnings to the end of the Archaean This journey through the Earth's early history begins with the Earth's origin then examines the evolution of the mantle the origin of the continental crust the origin and evolution of the Earth's atmosphere and oceans and ends with the origin of life Looks at the evidence for the Earth's very early differentiation into core mantle crust atmosphere and oceans and how this differentiation saw extreme interactions within the Earth system Discusses Archaean Earth processes within the framework of the Earth System Science paradigm providing a qualitative assessment of the principal reservoirs and fluxes in the early Earth The book would be perfect for a graduate level or upper level undergraduate course on the early Earth It will also serve as a great starting point for researchers in solid Earth geochemistry who want to know more about the Earth's early atmosphere and biosphere and vice versa for low temperature geochemists who want to get a modern overview of the Earth's interior Geological Magazine 2008
