R. Uys, Lyn Middleton, 2004 The essentials of mental health nursing are presented in this fourth edition of a landmark nursing textbook on psychiatric nursing in South African primary health care and community health care settings      *The Mentally Ill* ,1960      *Remotivating the Mental Patient* Otto von Mering, 2003-01      **Ameliorating Mental Disability** Alfred A. Baumeister, 2017-07-12 This book grows out of the optimistic view that mental retardation can be treated It views mental retardation primarily as a behavioral problem A child is diagnosed as retarded primarily because he behaves in certain maladaptive ways not simply because he

may have a chromosomal anomaly The contributors view any intervention intended to produce adaptive changes in the behavior of the retarded as treatment The authors come from the fields of medicine special education and speech and hearing as well as from psychology The book is intended to help students and workers in the field apply research findings and theoretical formulations in their appraisal and treatment of mental retardation The primary emphasis of the book is empirical While many of the author s suggestions have not been subjected to rigorous experimental scrutiny almost all have been derived from close examination of the research literature A wide diversity of topics are included in this volume Criteria employed were the relevance of the topic to the understanding and modification of defective behavior and the subject s popularity or neglect in other sources *Ameliorating Mental Disability* will be of interest to medical officers in institutions for the mentally challenged lecturers giving courses for teachers of the educationally subnormal and to psychologists social workers and teachers

*Mental Illness and the Economy* Meyer Harvey Brenner, 1973 By correlating extensive economic and institutional data from New York State for the period from 1841 to 1967 Harvey Brenner concludes that instabilities in the national economy are the single most important source of fluctuations in mental hospital admissions or admission rates This relation is shown to have been relatively stable from pre Civil War times to the present and has not been visibly affected either by changes in psychiatric theory and practice or by any other major social change occurring in society as a whole during that time span Copyright Libri GmbH All rights reserved

**Martín Ramírez** Víctor M. Espinosa, 2015-11-01

Martín Ramírez a Mexican migrant worker and psychiatric patient without formal artistic training has been hailed by leading New York art critics as one of the twentieth century s greatest artists His work has been exhibited alongside masters such as José Clemente Orozco Diego Rivera Rufino Tamayo Salvador Dalí Marc Chagall Paul Klee and Joan Mir A landmark exhibition of Ramírez s work at the American Folk Art Museum in 2007 broke attendance records and garnered praise from major media including the New York Times New Yorker and Village Voice Martín Ramírez offers the first sustained look at the life and critical reception of this acclaimed artist Víctor Espinosa challenges the stereotype of outsider art as an indecipherable enigma by delving into Ramírez s biography and showing how he transformed memories of his life in Mexico as well as his experiences of displacement and seclusion in the United States into powerful works of art Espinosa then traces the reception of Ramírez s work from its first anonymous showings in the 1950s to contemporary exhibitions and individual works that have sold for as much as a half million dollars This eloquently told story reveals how Ramírez s three decades long incarceration in California psychiatric institutions and his classification as chronic paranoid schizophrenic stigmatized yet also protected what his hands produced Stripping off the labels psychotic artist and outsider master Martín Ramírez demonstrates that his drawings are not passive manifestations of mental illness Although he drew

while confined as a psychiatric patient the formal elements and content of Ramirez's artwork are shaped by his experiences of cultural and physical displacement

**The Clinical Psychology of Aging** Martha Storandt, Ilene C. Siegler, Merrill F. Elias, 2012-12-06 It has been estimated that there are at least 2 500 000 adults 10% of the population above age 65 who are currently in need of some sort of mental health services Kramer Taube and Redick 1973 Other estimates are even higher e.g. Pfeiffer 1977 It is expected that this number will increase as the number of older adults increases over the next 40 years Probably less than 400 clinical psychologists are now providing services to this age group The number of elderly patients actually seen by these psychologists is very very small One national survey found that of 353 psychologists who reported that they had older clients only 495 individuals were seen for psychological testing and 1423 for psychotherapy in the one month just prior to the response Dye in press Assuming that the same individuals were not seen for both testing and therapy within the one month period a questionable assumption approximately 08% of the at least two and one half million older adults in need of psychological services are now being supplied with these services in some form or another Thus the need for increased involvement of clinical psychology with the aged is undeniable However few resources currently exist which will serve to increase the number of clinical psychologists trained to meet this need Probably less than 100 clinical psychologists living today have received any kind of formal graduate training in the clinical psychology of the aging Storandt 1977

Grob, 1994-02-21 In the first comprehensive one volume history of the treatment of the mentally ill the foremost historian in the field compellingly recounts our various attempts to solve this ever present dilemma from colonial times to the present Gerald Grob charts the growth of mental hospitals in response to the escalating numbers of the severely and persistently mentally ill and the deterioration of these hospitals under the pressure of too many patients and too few resources Mounting criticism of psychiatric techniques such as shock therapies drugs and lobotomies and of mental institutions as inhumane places led to a new emphasis on community care and treatment While some patients benefited from the new community policies they were ineffective for many mentally ill substance abusers Grob's definitive history points the way to new solutions It is at once an indispensable reference and a call for a humane and balanced policy in the future **Hospital Administration**, 1958 **Basic Readings in Social Security** United States.
