Rogers, 2025-01-28 A powerful new account of what a group of nineteenth and twentieth century African American activists intellectuals and artists can teach us about democracy Could the African American political tradition save American democracy African Americans have had every reason to reject America's democratic experiment Yet African American activists intellectuals and artists who have sought to transform the United States into a racially just society have put forward some of the most original and powerful ideas about how to make America live up to its democratic ideals In *The Darkened Light of Faith* Melvin Rogers provides a bold new account of African American political thought through the works and lives of individuals who built this vital tradition a tradition that is urgently needed today The book reexamines how figures as diverse as David Walker Frederick Douglass Anna Julia Cooper Ida B Wells W E B Du Bois Billie Holiday and James Baldwin thought about the politics people character and culture of a society that so often dominated them Sharing a light of faith darkened but not extinguished by the tragic legacy of slavery they resisted the conclusion that America would always be committed to white supremacy They believed that democracy is always in the process of becoming and that they could use it to reimagine society But they also saw that achieving racial justice wouldn't absolve us of the darkest features of our shared past and that democracy must be measured by how skillfully we confront a history that will forever remain with us An ambitious account of the profound ways African Americans have reimagined democracy *The Darkened Light of Faith* offers invaluable lessons about how to grapple with racial injustice and make democracy work      *Dear Appalachia* Emily Satterwhite, 2011-10-01 Much criticism has been directed at negative stereotypes of Appalachia perpetuated by movies television shows and news media Books on the other hand often draw enthusiastic praise for their celebration of the simplicity and authenticity of the Appalachian region *Dear Appalachia Readers Identity and Popular Fiction* since 1878 employs the innovative new strategy of examining fan mail reviews and readers geographic affiliations to understand how readers have imagined the region and what purposes these imagined geographies have served for them As Emily Satterwhite traces the changing visions of Appalachia across the decades from the Gilded Age 1865 1895 to the present she finds that every generation has produced an audience hungry for a romantic version of Appalachia According to Satterwhite best selling fiction has portrayed Appalachia as a distinctive place apart from the mainstream United States has offered cosmopolitan white readers a sense of identity and community and has engendered feelings of national and cultural pride Thanks in part to readers faith in authors as authentic representatives of the regions they write about Satterwhite argues regional fiction often plays a role in creating and affirming regional identity By mapping the geographic locations of fans *Dear Appalachia* demonstrates that mobile white readers in particular including regional elites have idealized Appalachia as

rooted static and protected from commercial society in order to reassure themselves that there remains an authentic America untouched by global currents Investigating texts such as John Fox Jr s *The Trail of the Lonesome Pine* 1908 Harriette Arnow s *The Dollmaker* 1954 James Dickey s *Deliverance* 1970 and Charles Frazier s *Cold Mountain* 1997 *Dear Appalachia* moves beyond traditional studies of regional fiction to document the functions of these narratives in the lives of readers revealing not only what people have thought about Appalachia but why *Italian Opera* David R. B. Kimbell,1991 David Kimbell traces the history of Italian opera from the Renaissance to the early twentieth century *New Vistas* Janice C.

Oresman,1984 **Systemic Semiotics** Piotr Sadowski,2022-09-08 Against the background of often esoteric literature in semiotics this book offers a fresh and rigorous new interpretation of how to approach the study of communication signs and meaning Grounded in a deductive theory of interacting systems Piotr Sadowski s book provides an accessible account of the hierarchy of communication Divided into two parts this book argues in the first section that a deductive semiotic theory generates communication situations of increasing complexity from contiguous communication to indirect referential forms based on indexical iconic and symbolic signs Within this system Sadowski explains how key concepts of the semiotic model such as information parainformation and metainformation can account for degrees of cognitive complexity of communication processes including the perception and interpretation of signs on literal and figurative levels After this clear step by step exposition of the theory of interacting systems Systemic Semiotics then explores various applications of this theory providing new insights into problems subsumed under communication studies cultural theory literary and film studies and psychology

**The Projective Cast** Robin Evans, 2000-08-25 Robin Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form Anyone reviewing the history of architectural theory Robin Evans observes would have to conclude that architects do not produce geometry but rather consume it In this long awaited book completed shortly before its author's death Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form He shows that geometry does not always play a stolid and dormant role but in fact may be an active agent in the links between thinking and imagination imagination and drawing drawing and building He suggests a theory of architecture that is based on the many transactions between architecture and geometry as evidenced in individual buildings largely in Europe from the fifteenth to the twentieth century From the Henry VII chapel at Westminster Abbey to Le Corbusier's Ronchamp from Raphael's S Eligio and the work of Piero della Francesca and Philibert Delorme to Guarino Guarini and the painters of cubism Evans explores the geometries involved asking whether they are in fact the stable underpinnings of the creative intuitive or rhetorical aspects of architecture In particular he concentrates on the history of architectural projection the geometry of vision that has become an internalized and pervasive pictorial method of construction and that until now has played only a small part in the development of architectural theory Evans describes the ambivalent role that pictures play in architecture and urges resistance to the idea that pictures provide all that architects need suggesting that there is much more within the scope of the architect's vision of a project than what can be drawn He defines the different fields of projective transmission that concern architecture and investigates the ambiguities of projection and the interaction of imagination with projection and its metaphors
