Renaissance Bazaar:

The Renaissance Bazaar Jerry Brotton, 2002 More than ever before the Renaissance stands as one of the defining moments in world history Between 1400 and 1600 European perceptions of society culture politics and even humanity itself emerged in ways that continue to affect not only Europe but the entire world This wide ranging exploration of the Renaissance sees the period as a time of unprecedented intellectual excitement and cultural experimentation and interaction on a global scale alongside a darker side of religion intolerance slavery and massive inequality of wealth and status It guides the reader through the key issues that defined the period from its art architecture and literature to advancements in the fields of science trade and travel In its incisive account of the complexities of the political and religious upheavals of the period the book argues that Europe s reciprocal relationship with its eastern neighbours offers us a timely perspective on the Renaissance as a moment of global inclusiveness that still has much to teach us today Renaissance Bazaar , **The**

Great Humanists Jonathan Arnold, 2011-10-14 Born out of a love of language text classical learning art philosophy and philology the Christian Humanist project lasted beyond the turmoil of sixteenth century Europe to survive in a new form in post Reformation thought Jonathan Arnold here explores the finest intellects of late Renaissance Europe providing an essential guide to the most important scholars priests theologians and philosophers of the period now collectively known as the Christian Humanists The Great Humanists provides an invaluable context to the philosophical political and spiritual state of Europe on the eve of the Reformation through inter related biographical sketches of Erasmus Thomas More Marsilio Ficino Petrarch Johann Reuchlin Jacques Lefevre d Etaples and many others The legacy of these thinkers is still relevant and widely studied today and this book will make invaluable reading for scholars and students of philosophy and early modern European history **Shakespeare Studies** Susan Zimmermann, Suzan Zimmerman, 2005-10 Shakespeare Studies is an international volume containing essays studies by critics cultural historians from both hemispheres Volume 33 continues the series in which specialists in theatrical traditions in the time of Shakespeare discuss the state of scholarly study in their areas

The Birth of Territory Stuart Elden, 2013-09-09 Political theory professor Stuart Elden explores the history of land ownership and control from the ancient to the modern world in *The Birth of Territory* Territory is one of the central political concepts of the modern world and indeed functions as the primary way the world is divided and controlled politically Yet territory has not received the critical attention afforded to other crucial concepts such as sovereignty rights and justice While territory continues to matter politically and territorial disputes and arrangements are studied in detail the concept of territory itself is often neglected today Where did the idea of exclusive ownership of a portion of the earth s surface come from and what kinds of complexities are hidden behind that seemingly straightforward definition *The Birth of Territory* provides a detailed account of the emergence of territory within Western political thought Looking at ancient medieval Renaissance and early modern thought Stuart Elden examines the evolution of the concept of territory from ancient Greece

to the seventeenth century to determine how we arrived at our contemporary understanding Elden addresses a range of historical political and literary texts and practices as well as a number of key players historians poets philosophers theologians and secular political theorists and in doing so sheds new light on the way the world came to be ordered and how the earth's surface is divided controlled and administered *The Birth of Territory* is an outstanding scholarly achievement a book that already promises to become a classic in geography together with very few others published in the past decades *Political Geography* An impressive feat of erudition *American Historical Review* **Visual Time** Keith Moxey, 2013-06-17 *Visual Time* offers a rare consideration of the idea of time in art history Non Western art histories currently have an unprecedented prominence in the discipline To what extent are their artistic narratives commensurate with those told about Western art Does time run at the same speed in all places Keith Moxey argues that the discipline of art history has been too attached to interpreting works of art based on a teleological categorization demonstrating how each work influences the next as part of a linear sequence which he sees as tied to Western notions of modernity In contrast he emphasizes how the experience of viewing art creates its own aesthetic time where the viewer is entranced by the work itself rather than what it represents about the historical moment when it was created Moxey discusses the art and writing about the art of modern and contemporary artists such as Gerard Sekoto Thomas Demand Hiroshi Sugimoto and Cindy Sherman as well as the sixteenth century figures Pieter Bruegel the Elder Albrecht Dürer Matthias Grünewald and Hans Holbein In the process he addresses the phenomenological turn in the study of the image its application to the understanding of particular artists the ways verisimilitude eludes time in both the past and the present and the role of time in nationalist accounts of the past **The Renaissance** Jerry Brotton, 2006-04-27 More than ever before the Renaissance stands as one of the defining moments in world history Between 1400 and 1600 European perceptions of society culture politics and even humanity itself emerged in ways that continue to affect not only Europe but the entire world This wide ranging exploration of the Renaissance sees the period as a time of unprecedented intellectual excitement and cultural experimentation and interaction on a global scale alongside a darker side of religion intolerance slavery and massive inequality of wealth and status It guides the reader through the key issues that defined the period from its art architecture and literature to advancements in the fields of science trade and travel In its incisive account of the complexities of the political and religious upheavals of the period the book argues that Europe's reciprocal relationship with its eastern neighbours offers us a timely perspective on the Renaissance that still has much to teach us today **ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable **Marriage, Performance, and Politics at the Jacobean Court** Kevin Curran, 2016-05-06 *Marriage Performance and Politics at the Jacobean Court* constitutes the first full length study of

Jacobean nuptial performance a hitherto unexplored branch of early modern theater consisting of masques and entertainments performed for high profile weddings Scripted by such writers as Ben Jonson Thomas Campion George Chapman and Francis Beaumont these entertainments were mounted for some of the most significant political events of James s English reign Here Kevin Curran analyzes all six of the elite weddings celebrated at the Jacobean court reading the masques and entertainments that headlined these events alongside contemporaneously produced panegyrics festival books sermons parliamentary speeches and other sources The study shows how collectively wedding entertainments turned the idea of union into a politically versatile category of national representation and offered new ways of imagining a specifically Jacobean form of national identity by doing so Remapping the Humanities Mary Garrett, Heidi Gottfried, Sandra F. VanBurkleo, 2008 An innovative collection demonstrating the rich potential for interdisciplinary learning found within the network of university based humanities centers Remapping the Humanities celebrates the tenth anniversary of the Wayne State University Humanities Center by bringing together essays that illustrate the richness of public conversations developed in interdisciplinary humanities centers The contributors to this collection represent more than a dozen disciplines including philosophy English political science history law comparative literature and Spanish and taken together their essays illustrate an ongoing remapping of the intellectual landscape as scholars from across university departments engage one another in unpredictable ways This volume is divided into four thematic sections Identity and Community Remembering and Forgetting Nationalism and Globalism and Toward Post Modernity Yet the essays deliberately represent a range of theoretical perspectives that interact synergistically such as feminism and postcolonial studies or literary criticism and art history They also tackle topics as varied as the formation of the modern family in France and the inculcation of civic virtue in American cities and they draw freely from different sources of evidence like newspaper accounts popular literature paintings and diaries Remapping the Humanities includes unique touches such as a portfolio of full color images and an audio CD of Celtic inspired jazz In addition a preface by Walter Edwards academic director of the Humanities Center at Wayne State University gives some background on this institution and the work being done there The importance of Remapping the Humanities ultimately lies in its refusal to say that learning has ended and the example it provides of the value of calculated ferment and intellectual instability Educators involved with or wanting to learn more about interdisciplinary research will appreciate this unique collection

Human Dignity in the Judaeo-Christian Tradition John Loughlin, 2019-07-11 Dignity is a fundamental aspect of our lives yet one we rarely pause to consider our understandings of dignity on individual collective and philosophical perspectives shape how we think act and relate to others This book offers an historical survey of how dignity has been understood and explores the concept in the Judaeo Christian tradition World renowned contributors examine the roots of human dignity in classical Greece and Rome and the Scriptures as well as in the work of theologians such as St Thomas Aquinas and St John Paul II Further chapters consider dignity within Renaissance art and sacred music The volume shows that dignity is also a contemporary issue by analysing situations where the traditional understanding has been challenged by philosophical and policy developments To this end further essays look at the role of dignity in discussions about transhumanism religious freedom robotics and medicine Grounded in the principal Christian traditions of Catholicism Orthodoxy Anglicanism and Protestantism this book offers an interdisciplinary and cross period approach to a timely topic It validates the notion of human dignity and offers an introduction to the field while also challenging it **Shakespeare and Hospitality** Julia

Reinhard Lupton, David Goldstein, 2016-04-20 This volume focuses on hospitality as a theoretically and historically crucial phenomenon in Shakespeare's work with ramifications for contemporary thought and practice Drawing a multifaceted picture of Shakespeare's scenes of hospitality with their numerous scenes of greeting feeding entertaining and sheltering the collection demonstrates how hospitality provides a compelling frame for the core ethical political theological and ecological questions of Shakespeare's time and our own By reading Shakespeare's plays in conjunction with contemporary theory as well as early modern texts and objects including almanacs recipe books husbandry manuals and religious tracts this book reimagines Shakespeare's playworld as one charged with the risks of hosting rape and seduction war and betrayal enchantment and disenchantment and the limits of generosity how much can or should one give the guest with what attitude or comportment and under what circumstances This substantial volume maps the terrain of Shakespearean hospitality in its

rich complexity demonstrating the importance of historical rhetorical and phenomenological approaches to this diverse subject

A World Art History and Its Objects David Carrier, 2008-11-28 Is writing a world art history possible Does the history of art as such even exist outside the Western tradition Is it possible to consider the history of art in a way that is not fundamentally Eurocentric In this highly readable and provocative book David Carrier a philosopher and art historian does not attempt to write a world art history himself Rather he asks the question of how an art history of all cultures could be written or whether it is even possible to do so He also engages the political and moral issues raised by the idea of a multicultural art history Focusing on a consideration of intersecting artistic traditions Carrier negotiates the way meaning and understanding shift or are altered when a visual object from one culture for example is inserted into the visual tradition of another culture *A World Art History and Its Objects* proposes the use of temporal narrative as a way to begin to understand a multicultural art history

The Thinking Past Adrian Cole, Stephen Ortega, 2014-08-26 This book takes an analytical approach to world history Instead of proceeding through history descriptively it looks at several major questions and ideas such as the role of technology the development of universal religions global trade or participatory politics If this sounds thematic it is But it also progresses chronologically analyzing these themes as they apply in certain eras We use both primary sources in text and the latest scholarship as secondary source These we use frequently in each chapter both to employ the voices of scholars where they say things better than we could and footnote them for students reference We also hope to convey the sense that all this content is part of an ongoing debate amongst historians and scholars from different disciplines Finally we attempt to keep the text accessible by focusing on narrative elements of history and keeping in mind that the readers are undergraduates often with little exposure to the subject matter However the level of ideas remains high Provided by publisher

Geographical Knowledge and Imperial Culture in the Early Modern Ottoman Empire Pinar Emiralioğlu, 2016-12-05 Exploring the reasons for a flurry of geographical works in the Ottoman Empire in the sixteenth century this study analyzes how cartographers travellers astrologers historians and naval captains promoted their vision of the world and the centrality of the Ottoman Empire in it It proposes a new case study for the interconnections among empires in the period demonstrating how the Ottoman Empire shared political cultural economic and even religious conceptual frameworks with contemporary and previous world empires

Orientalism Revisited Ian Richard Netton, 2012 The publication of Edward Said's *Orientalism* in 1978 marks the inception of orientalism as a discourse Since then Orientalism has remained highly polemical and has become a widely employed epistemological tool Three decades on this volume sets out to survey analyse and revisit the state of the Orientalist debate both past and present The leitmotiv of this book is its emphasis on an intimate connection between art land and voyage Orientalist art of all kinds frequently derives from a consideration of the land which is encountered on a voyage or pilgrimage a relationship which until now has received little attention Through adopting a thematic and prosopographical approach and attempting to locate the fundamentals of the

debate in the historical and cultural contexts in which they arose this book brings together a diversity of opinions analyses and arguments

East Meets West in the Middle Ages and Early Modern Times Albrecht Classen, 2013-09-03 This new volume explores the surprisingly intense and complex relationships between East and West during the Middle Ages and the early modern world combining a large number of critical studies representing such diverse fields as literary German French Italian English Spanish and Arabic and other subdisciplines of history religion anthropology and linguistics The differences between Islam and Christianity erected strong barriers separating two global cultures but as this volume indicates despite many attempts to Other the opposing side the premodern world experienced an astonishing degree of contacts meetings exchanges and influences Scientists travelers authors medical researchers chroniclers diplomats and merchants criss crossed the East and the West or studied the sources produced by the other culture for many different reasons As much as the theoretical concept of Orientalism has been useful in sensitizing us to the fundamental tensions and conflicts separating both worlds at least since the eighteenth century the premodern world did not quite yet operate in such an ideological framework Even though the Crusades had violently pitted Christians against Muslims there were countless contacts and a palpable curiosity on both sides both before during and after those religious warfares

A New Antiquity Alessandra Russo, 2024-02-22 We tend to think of sixteenth century European artistic theory as separate from the artworks displayed in the non European sections of museums Alessandra Russo argues otherwise Instead of considering the European experience of New World artifacts and materials through the lenses of curiosity and exoticism Russo asks a different question What impact have these works had on the way we currently think about and theorize the arts Centering her study on a vast corpus of early modern textual and visual sources Russo contends that the subtlety and inventiveness of the myriad of American Asian and African creations that were pillaged exchanged and often eventually destroyed in the context of Iberian colonization including sculpture painting metalwork mosaic carving architecture and masonry actually challenged and revolutionized sixteenth century European definitions of what art is and what it means to be human In this way artifacts coming from outside Europe between 1400 and 1600 played a definitive role in what are considered distinctively European transformations the redefinition of the frontier between the mechanical and the liberal arts and a new conception of the figure of the artist Original and convincing A New Antiquity is a pathbreaking study that disrupts existing conceptions of Renaissance art and early modern humanity It will be required reading for art historians specializing in the Renaissance scholars of Iberian and Latin American cultures and global studies and anyone interested in anthropology and aesthetics
