accepted that by age two children assume that an object hidden in a box will remain there unchanged until someone tampers with it Eugene Subbotsky persuasively demonstrates that many children and some adults will often accept mysterious disappearances and creations perceiving them not as tricks or illusions but as actual occurrences His analysis clearly shows that alongside our everyday belief in object permanence we also have a set of quasi magical beliefs that can be activated by appropriate situations and behaviors The acceptability of these beliefs will vary from culture to culture and will be widespread among preliterate peoples but less obvious in advanced industrial countries The author a Russian psychologist draws on his own extensive research and examines other taken for granted concepts such as the distinction between animate and inanimate Foundations of the Mind amply illustrated with experimental material has enormous implications for the study of both child development and the psychology of human beliefs It attacks our complacent and often culturally biased faith in the nature of reality and as such will become required reading for all psychologists **North Atlantic Coast Fisheries**

encounters between Iran and Russia have been both rich and complex This book explores the myriad dimensions of the Iranian Russian encounter during a dramatic period which saw both Iran and Russia subject to revolutionary upheavals and transformed from multinational dynastic empires typical of the nineteenth century to modernizing authoritarian states typical of the twentieth The collection provides a fresh perspective on traditional preoccupations of international relations wars and diplomacy the hostility of opposing nationalisms the Russian imperial menace in the nineteenth century and the Soviet threat in the twentieth Going beyond the traditional this book examines subaltern as well as elite relations and combines a cultural social and intellectual dimension with the political and diplomatic In doing so the book seeks to construct a new discourse which contests the notion of an implacable enmity between Iran and Russia Bringing together leading scholars in the field this book demonstrates extensive use of family archives Iranian Russian and Caucasian travelogues and memoirs and newly available archives in both Iran and the countries of the former Soviet Union Providing essential background to current international tensions this book will be of particular use to students and scholars with an interest in the Middle East and Russia

considerable interest to historians yet little focus has been given to Russia's historical connections to Iran. This book thus represents a valuable contribution to Iranian and Russian History as well as International Relations. *Sovereignty Experiments* Alyssa M. Park, 2019-03-15. *Sovereignty Experiments* tells the story of how authorities in Korea, Russia, China, and Japan through diplomatic negotiations, border regulations, legal categorization of subjects and aliens, and cultural policies competed to control Korean migrants as they suddenly moved abroad by the thousands in the late nineteenth century. Alyssa M. Park argues that Korean migrants were essential to the process of establishing sovereignty across four states because they tested the limits of state power over territory and people in a borderland where authority had been long asserted but not necessarily enforced. Traveling from place to place, Koreans compelled statesmen to take notice of their movement and to experiment with various policies to govern it. Ultimately, states' efforts culminated in drastic measures including the complete removal of Koreans on the Soviet side. As Park demonstrates, what resulted was the stark border regime that still stands between North Korea, Russia, and China today. Skillfully employing a rich base of archival sources from across the region, *Sovereignty Experiments* sets forth a new approach to the transnational history of Northeast Asia. By focusing on mobility and governance, Park illuminates why this critical intersection of Asia was contested, divided, and later reimagined as parts of distinct nations and empires. The result is a fresh interpretation of migration, identity, and state making at the crossroads of East Asia and Russia.
