Sarah Bowdich Lee (1791-1856) and Pioneering Perspectives on Natural History Mary Orr,2024-09-17 History from below uncovers overlooked protagonists contributing to inter national endeavour often against considerable odds Mrs T Edward Bowdich

then Mrs R Lee 1791 1856 is indicative When women allegedly cannot participate in early nineteenth century scientific exploration discovery and publication Sarah s multiple specialist contributions to French and British natural history have attracted no book length study This first appraisal of Sarah s unbroken production of discipline changing scientific work over three decades in modern ichthyology in historical geography of West Africa and in the next generational dissemination of expert scientific knowledge does more than fill this gap The book also pivotally investigates the intercultural interdisciplinary and multi genre reach of Sarah s pioneering perspectives and contributions and how she could achieve her work independently in her own name s over three decades Sarah s larger significance is then to provide a very different narrative for women at work in expert nineteenth century natural history making By everywhere challenging the secondary minor and domestic frames for women s contributions of the period the pioneering perspectives of Sarah s story also provide alternative paradigms to the leaky pipeline model still informing women s careers and work in STEM M today

Fundamentals of Machine Learning for Predictive Data Analytics, second edition John D. Kelleher, Brian Mac Namee, Aoife

D'Arcy, 2020-10-20 The second edition of a comprehensive introduction to machine learning approaches used in predictive data analytics covering both theory and practice Machine learning is often used to build predictive models by extracting patterns from large datasets These models are used in predictive data analytics applications including price prediction risk assessment predicting customer behavior and document classification This introductory textbook offers a detailed and focused treatment of the most important machine learning approaches used in predictive data analytics covering both theoretical concepts and practical applications Technical and mathematical material is augmented with explanatory worked examples and case studies illustrate the application of these models in the broader business context This second edition covers recent developments in machine learning especially in a new chapter on deep learning and two new chapters that go beyond predictive analytics to cover unsupervised learning and reinforcement learning The book is accessible offering nontechnical explanations of the ideas underpinning each approach before introducing mathematical models and algorithms It is focused and deep providing students with detailed knowledge on core concepts giving them a solid basis for exploring the field on their own Both early chapters and later case studies illustrate how the process of learning predictive models fits into the broader business context The two case studies describe specific data analytics projects through each phase of development from formulating the business problem to implementation of the analytics solution The book can be used as a textbook at the introductory level or as a reference for professionals
