**Corporate Board of Directors** Ismail Lahlou,2018-12-26 Corporate governance a subject that a few decades ago escaped the attention of all but a handful of academics and

shareholders has gradually become a central concern worldwide This book contributes to the existing literature on the structure and effectiveness of corporate boards It comprises three topics that address distinct research questions on board structure the deployment of board resources to monitoring and advisory duties and the use of equity based incentives in the compensation packages of directors Firstly the book provides strong new evidence on the importance of corporate board functions in value creation Secondly it provides some evidence of the potential conflict between the two primary functions of corporate boards The results indicate that while the board s advising quality weakens when the board is principally devoted to monitoring duties the presence of advisory directors on the board does not have any impact on the effectiveness of board oversight which offers a more complete view on the tradeoffs between the board s two major functions Finally the results suggest that the closer directors compensation is tied to the firm s stock the more consistent corporate acquisition decisions are with shareholder interests

**Directors, Financial Derivatives, and Corporate Governance: The Case of Vietnam** Tran Thi Hong Lien, 2022-05-09. This book gives readers a look inside the boardrooms and directors' minds, a desirable but highly challenging task for researchers due to the lack of access to top teams in organizations. This book breaks through that barrier with a mixed methods investigation of boardrooms in the emerging country of Vietnam, particularly on the topic of financial derivatives. Directors are the leading players within the corporate governance framework. The general effectiveness of the board depends on their roles, processes and competencies. Given the scandals marring the history of the financial industry, this book aims to tackle the question of whether board directors have the financial acumen required to handle the tricky instruments of financial derivatives through interviews with board directors and analysis of their organizations. Providing a managerial perspective of financial derivatives, this distinguishes itself from more popular financial engineering books and would be a useful read for government officials, board directors, training organizations and scholars, particularly in Vietnam.
