Kolaczyk,2009-04-20 In recent years there has been an explosion of network data that is measu ments that are either of or from a system conceptualized as a network from se ingly all corners of science The combination of an increasingly pervasive interest in scienti c analysis at a systems level and the ever growing capabilities for hi throughput data collection in various elds has fueled this trend Researchers from biology and bioinformatics to physics from computer science to the information sciences and from economics to sociology are more and more engaged in the c lection and statistical analysis of data from a network centric perspective Accordingly the contributions to statistical methods and modeling in this area have come from a similarly broad spectrum of areas often independently of each other Many books already have been written addressing network data and network problems in speci c individual disciplines However there is at present no single book that provides a modern treatment of a core body of knowledge for statistical analysis of network data that cuts across the various disciplines and is organized rather according to a statistical taxonomy of tasks and techniques This book seeks to ll that gap and as such it aims to contribute to a growing trend in recent years to facilitate the exchange of knowledge across the pre existing boundaries between those disciplines that play a role in what is coming to be called network science   **Propensity Score Methods and Applications** Haiyan Bai,M. H. Clark,2018-11-20 A concise introductory text Propensity Score Methods and Applications describes propensity score methods PSM and how they are used to balance the distributions of observed covariates between treatment conditions as a means to reduce selection bias This new QASS title specifically focuses on the procedures of implementing PSM for research in social sciences instead of merely demonstrating the effectiveness of the method Using succinct and approachable language to introduce the basic concepts of PSM authors Haiyan Bai and M H Clark present basic concepts assumptions procedures available software packages and step by step examples for implementing PSM using real world data with exercises at the end of each chapter allowing readers to replicate examples on their own   *Applied Statistics for the Social and Health Sciences* Rachel A.
