Bremer,1994 Puritan studies is one of the most heavily researched areas of scholarship in both England and the United States In this in depth exploration of the relationship between Puritans in England and New England Francis J Bremer challenges the view that the colonists turned away from English Puritans in the 1640s Rather he convincingly demonstrates that the two communities retained a complex symbiotic connection a communion throughout the seventeenth century and that the clergy on both sides of the Atlantic saw themselves as closely linked in their spiritual mission Focusing on the interaction between social experience and the shaping of belief Bremer thoroughly analyzes how Puritan clergymen of a congregational persuasion came together in a godly communion and examines how that communion sustained them in times of trouble and physical dispersal He explains the social forces that led to the articulation of early Congregationalism and details the significance of trans Atlantic religious exchanges through correspondence associations publications and other devices Bremer traces the first generation Puritans from their formative years at Cambridge University through the creation of a network of clerical friendships through the flight to Holland and to New England to the death of Oliver Cromwell and the beginnings of division within Congregationalism This thought provoking volume makes a solid contribution to Puritan studies and offers a basis for further discussions of the trans Atlantic aspects of the Congregational community

**Toys and Playthings** John Newson, Elizabeth Newson, 2017-12-06 John and Elizabeth Newson were well known for their studies of child rearing which have combined a rigorous research methodology with sympathetic insights into family life and a lively approach to scientific reporting Path breaking brilliant seminal outstanding fascinating enthralling and enchanting are some of the adjectives used by critics to describe their previous books They now turn their attention to toys the pegs on which children hang their play a study for which they are uniquely qualified Not only had they long experience in normal child development they had been actively involved for many years in research and training in remedial play for disabled children their research unit was a major influence in the phenomenal development of the toy libraries self help movement they designed for and advised the toy industry and they had their own family run specialist toyshop With this background it is not surprising that their book on toys and playthings is both informative and entertaining on many different fronts Richly observant it follows the child's development in play from using the mother or father as the first and best toy through the exploratory and manipulative sequences to the use of toys in ritual symbolic or contemplative ways Against this detailed understanding of ordinary children's growth points in play the Newsons and their collaborators examine the special needs of disabled children with a firm emphasis on how parents can help What is more in providing an intensely practical guide for the parents and teachers of the disabled child they draw out comparative insights which are enlightening and absorbing for those whose children do not have such urgent problems Once again the Newsons share with the reader the viewpoints and preoccupations of research workers in the field There is indeed a continual sense of work in progress and nowhere more than in the chapter on using toys for developmental assessment where the reader is given a hot line to a laboratory i.e. playroom notes used in their own research unit at the time in a welcome move away from the rigid test bound assessment of special children The book is enriched by the authors sharp awareness that the history of

playthings has a far longer perspective than the history of child psychology They are not basically interested in educational toys as such but in all the objects made or found on which the child hones his skill his reasoning powers his imagination his emotions or his sense of humour Fairground baubles joke toys and poppy head dolls are as much a part of this book as bricks sorting boxes and teddy bears In the Newsons own words We hope that people who simply like toys as objects will find something in this book to interest them we suspect indeed that liking toys will be what all readers whatever their reason for opening the book have in common
