Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions Other contributors however pose broader questions about the nature of selective admissions about institutional responses to the changing demography of those seeking to enter higher education or about the appropriate criteria of success in higher education The volume is particularly timely because the question of how changes in

admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger President at Michigan at the time the court cases were filed is particularly relevant This book brings together the research that underlies a variety of proposed approaches to improving the selection of students Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body this book explores the implications of the assessment component of K 12 school reform for higher education admissions practices The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools as well as for those scholars and scientists who research develop and validate tools for use in the process of choosing students in ways that are congruent with an institution s mission values and goals

**Distributed Leadership** Alma Harris, 2009-03-17 Alma Harris The eld of school leadership is currently preoccupied with the idea of distributed leadership Few ideas it seems have provoked as much attention debate and c troversy Whatever your position on distributed leadership and you cannot fail to have one it is irrefutable that distributed leadership has become the leadership idea of the moment Yet it is an idea that can be traced back as far as the mid 20s and possibly earlier So why the interest Part of the answer can be found in a move away from theorizing and empirical enquiry focused on the single leader This shift has undoubtedly been fuelled by structural changes within schools and across school systems that have resulted in ternative models or forms of leadership practice Evidence highlights how those cupying formal leadership positions are increasingly recognizing the limitations of existing structural arrangements to secure organizational growth and transformation Fullan et al 2007 Harris et al 2008 Chapman et al 2008 As a consequence many heads and principals are actively restructuring realigning and redesigning leadership practice in their school Harris 2008 While the terminology to

describe such changes varies the core principle is one of extending or sharing leadership practice While scholars have long argued for the need to move beyond those at the top of organizations in order to examine leadership Barnard 1968 Katz and Kahn 1966 until relatively recently much of the school leadership literature has tended to focus upon the head or the principal

Same, Different, Equal Rosemary C. Salomone, 2008-10-01 Although coeducation has been the norm within private and public schools since the 1970s single sex education has staged a comeback in recent years as a means of addressing the academic and social problems faced by some students Single sex education raises controversy on ideological grounds and in 1996 the Supreme Court struck down the all male admissions policy at the Virginia Military Institute in a decision that has cast a legal cloud over public initiatives In this timely book Rosemary Salomone offers a reasoned educational and legal argument supporting single sex education as an alternative to coeducation particularly in the case of disadvantaged minority students Salomone examines the history of women s education and exclusion philosophical and psychological theories of sameness and difference findings on educational achievement and performance the research

evidence on single sex schooling and the legal questions that have arisen Correcting many of the current misconceptions about single sex education she argues that it is a viable option and that the road to gender equality should be paved with diverse educational opportunities for all students regardless of race class or gender     *Education Reform in the American States* Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public     *American Book Publishing Record* ,2002
